INTEGRATED PERFORMANCE DASHBOARD

November 2019

Summary

Background

At the end of the calendar year 2017 the Welsh Government issued a consultation proposing that responsibility for healthcare services in the Bridgend County Borough Council (CBC) area should transfer to Cwm Taf University Health Board (Cwm Taf) from Abertawe Bro Morgannwg University Health Board (ABMU); moving the health board boundary accordingly. Following due process, the outcome of the consultation was that the Health Board boundary be changed in accordance with the proposal; the change to take effect from 1 April 2019.

Performance Dashboard

This is the fifth performance dashboard to be produced by the Health Board providing performance reporting for Cwm Taf Morgannwg University Health Board. This dashboard is the September 2019 iteration, the dashboard wherever possible provides august reporting data.

The dashboard has been redesigned with distinct sections that show performance for Cwm Taf University Health Board (as was), Bridgend and Cwm Taf Morgannwg University Health Board.

For ease of reading the following terms have been used:

| | |
|---|---|
| Cwm Taf University Health Board | has been referred to as "CT" |
| Bridgend | has been referred to as Bridgend or "B" |
| Cwm Taf Morgannwg University Health Board | has been referred to as "CTM" |

The nomenclature N/A is used to show that data is "not available"

The following colour coding has been used for graphical representation where possible:

| | |
|----------|----------------------------|
| CT | Light Blue |
| CTM | Dark Blue (Corporate Blue) |
| Wales | Red |
| Bridgend | Green |

Performance Data

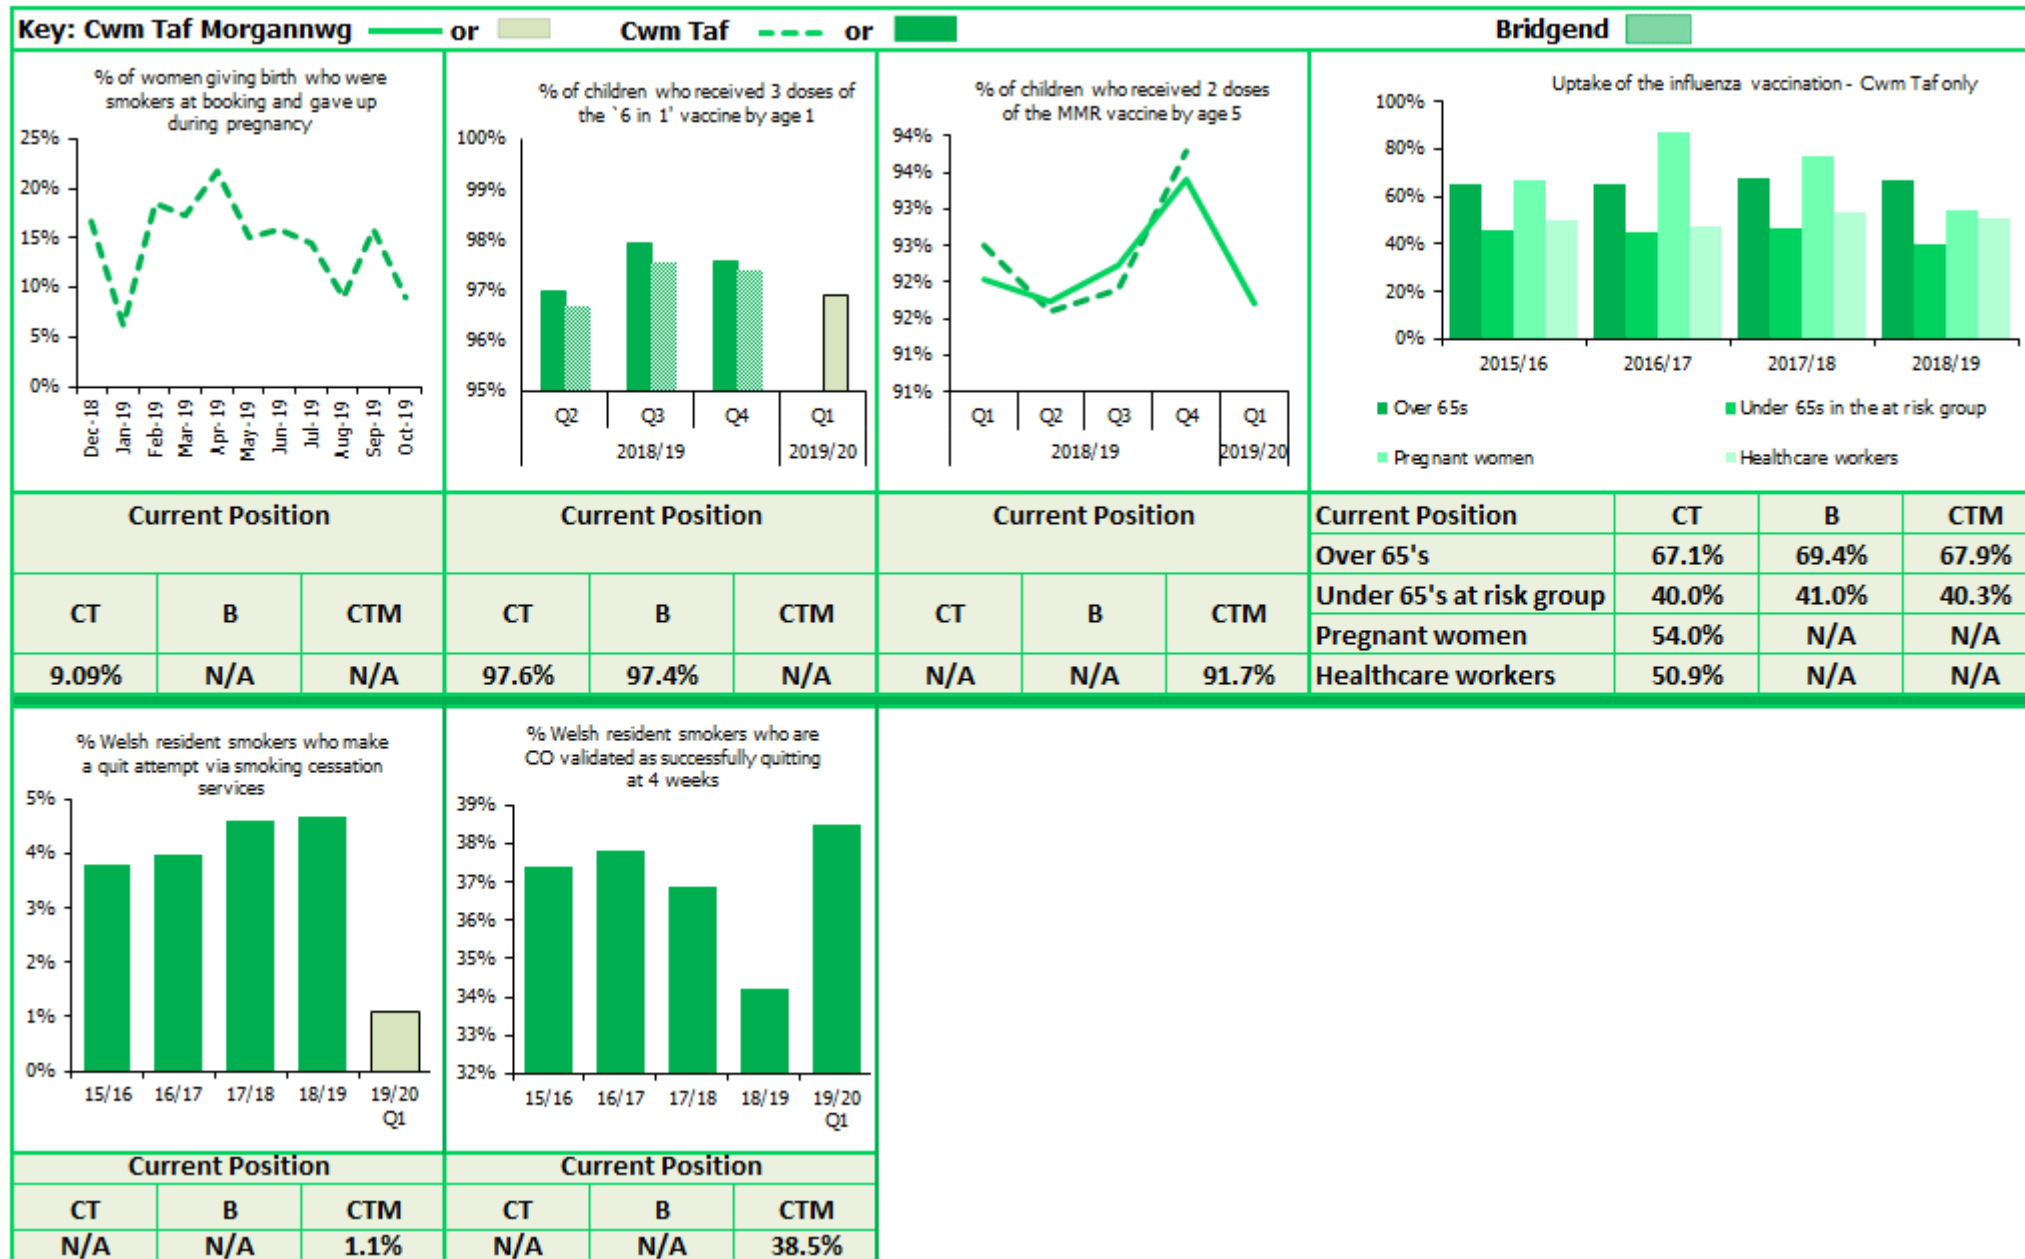

Where performance data is available for CT, B and/or CTM this has been incorporated into this dashboard, where data is not currently available or as yet, not reported, this has been highlighted within the appropriate section. As far as is possible data for Bridgend has been quality assured, however, data should be used with due caution.

Table of Contents

| | |
|---|-----------|
| STAYING HEALTHY – People in Wales are well informed and supported to manage their own physical and mental health | 5 |
| Indicator 1: Of those women who had their initial assessment and gave birth within the same health board, the percentage of pregnant women who gave up smoking during pregnancy (by 36-38 weeks of pregnancy).. | 6 |
| Indicator 2: Percentage of children who received 3 doses of the hexavalent ‘6 in 1’ vaccine by age 1 | 7 |
| Indicator 3: Percentage of children who received 2 doses of the MMR vaccine by age 5 | 7 |
| Indicator 5: Uptake of the influenza vaccination among: (a) 65 year olds and over; (b) under 65s in risk group; (c) pregnant women; (d) health care workers | 8 |
| Indicator 6: The percentage of adult smokers who make a quit attempt via smoking cessation services..... | 9 |
| Indicator 7: The percentage of those smokers who are CO-validated as quit at 4 weeks..... | 10 |
| SAFE CARE – People in Wales are protected from harm and are supported to protect themselves from known harm | 11 |
| Indicator 12: Amenable mortality per 100,000 of the European standardised population | 12 |
| Indicator 13: Percentage of in-patients with a positive sepsis screening who have received all elements of the ‘Sepsis Six’ first hour care bundle within one hour of positive screening..... | 13 |
| Indicator 14: Percentage of patients who presented to the Emergency Department with a positive sepsis screening who have received all elements of the ‘Sepsis Six’ first hour care bundle within one hour of positive screening | 14 |
| Indicator 15: The number of potentially preventable hospital acquired thrombosis | 15 |
| Indicator 16: Total antibacterial items per 1,000 STAR-PU (specific therapeutic group age related prescribing unit) | 16 |
| Indicator 18: Cumulative rate of laboratory confirmed <i>E.coli</i> bacteraemia cases per 100,000 population..... | 17 |
| Indicator 19: Cumulative rate of laboratory confirmed <i>S.aureus</i> bacteraemia (MRSA & MSSA) cases per 100,000 population | 18 |
| Indicator 20: Cumulative rate of laboratory confirmed <i>C.difficile</i> cases per 100,000 population..... | 19 |
| Indicator 21: Non steroid anti-inflammatory drugs (NSAIDs) average daily quantity per 1,000 STAR-PU (specific therapeutic group age related prescribing unit) | 20 |
| Indicator 22: Number of Patient Safety Solutions Wales Alerts and Notices that were not assured within the agreed timescale | 21 |
| Indicator 23: Of the serious incidents due for assurance, the percentage which were assured within the agreed timescales..... | 22 |
| Indicator 24: Number of new never events | 22 |
| Local Measure: Number of incidents and severity reported..... | 23 |
| EFFECTIVE CARE – People in Wales receive the right care and support locally as possible and are enabled to contribute to making that care successful..... | 24 |
| Indicator 30: Number of health board mental health delayed transfer of care (rolling 12 months) | 25 |
| Indicator 30 continued: Number of health board mental health delayed transfer of care..... | 26 |
| Indicator 31: Number of health board non-mental health delayed transfer of care (rolling 12 months)..... | 27 |
| Indicator 31 continued: Number of health board non-mental health delayed transfer of care (rolling 12 months)..... | 28 |
| Local Measure: Critical Care – Delayed transfer of care | 29 |
| Indicator 32: Percentage of universal mortality reviews (UMRs) undertaken within 28 days of a death | 30 |
| Indicator 33: Crude hospital mortality rate (74 years of age or less) | 31 |
| Indicator 33 continued: Crude hospital mortality rate (74 years of age or less)..... | 32 |

| | |
|---|-----------|
| Indicator 34: Percentage compliance of the completed Level 1 Information Governance (Wales) training element of the Core Skills and Training Framework..... | 33 |
| Indicator 35: Percentage of episodes clinically coded within one reporting month post episode discharge end date | 34 |
| Indicator 36: Percentage of clinical coding accuracy attained in the NWIS national clinical coding accuracy audit programme | 35 |
| Indicator 37: All new medicines recommended by AWMMSG and NICE, including interim recommendations for cancer medicines, must be made available where clinically appropriate, no later than two months from the publication of the NICE Final Appraisal Determination and the AWMMSG appraisal recommendation | 36 |
| Indicator 38: Number of Health and Care Research Wales clinical research portfolio studies | 37 |
| Indicator 39: Number of Health and Care Research Wales commercially sponsored studies | 37 |
| Indicator 40: Number of patients recruited in Health and Care Research Wales clinical research portfolio studies..... | 37 |
| Indicator 41: Number of patients recruited in Health and Care Research Wales commercially sponsored studies | 37 |
| Indicator 38 to 41 continued:..... | 38 |
| Indicator 38 to 41 continued:..... | 39 |
| DIGNIFIED CARE – People in Wales are treated with dignity and respect and treat others the same | 40 |
| Indicator 43: Number of procedures postponed either on the day or the day before for specified non-clinical reasons..... | 41 |
| Indicator 44: Number of patients aged 75 and over with an AEC (Anticholinergic Effect on Condition) of 3 or more for items on active repeat, as a percentage of all patients aged 75 years and over | 42 |
| Indicator 46: The percentage of concerns that have received a final reply (under Regulation 24) or an interim reply (under Regulation 26) up to and including 30 working days from the date the concern was first received by the organisation | 43 |
| Indicator 47: Percentage of people in Wales registered at a GP practice (age 65 years or over) who are diagnosed with dementia..... | 44 |
| Local Measure: Percentage of Patients registered as receiving palliative care with their GP practice | 45 |
| TIMELY CARE - People in Wales have timely access to services based on clinical need and are actively involved in decisions about their care..... | 46 |
| TIMELY CARE – Part 2 | 47 |
| Indicator 53: Percentage of GP practices open during daily core hours or within 1 hour of daily core hours | 48 |
| Indicator 54: Percentage of GP practices offering daily appointments between 17:00 and 18:30 hours..... | 49 |
| Indicator 55: For health boards with Out of Hours (OoH) services, the percentage of urgent calls that were logged and patients started their clinical definitive assessment within 20 minutes of their initial calls being answered; for health boards with 111 services, the percentage of P1 calls that were logged and patients started their definitive assessment within 20 minutes of the initial calls being answered..... | 50 |
| Indicator 56: For health boards with Out of Hours (OoH) services, the percentage of patients prioritised as very urgent and seen (either in PCC or home visit) within 60 minutes following their clinical assessment/face to face triage for health boards with 111 services, the percentage of patients prioritised as P1 and seen (either in PCC or home visit) within 60 minutes following their clinical assessment/face to face triage | 51 |
| Indicator 58: The percentage of patients waiting less than 26 weeks for treatment | 52 |
| Indicator 59: The number of patients waiting more than 36 weeks for treatment | 53 |
| Indicator 60: The number of patients waiting more than 8 weeks for a specified diagnostic | 54 |
| Local Measure: Surveillance Patients | 55 |
| Indicator 61: The number of patients waiting more than 14 weeks for a specified therapy | 56 |
| Indicator 62: The number of patients waiting for an outpatient follow-up (NOT BOOKED) who are delayed past their agreed target date for planned care sub specialties | 57 |
| Indicator 62 continued: The number of patients waiting for an outpatient follow-up (BOOKED) who are delayed past their agreed target date for planned care sub specialties..... | 58 |
| Indicator 63-66: Percentage compliance with stroke quality improvement measures – QIM's | 59 |

| | |
|--|-----------|
| Indicator 67: The percentage of emergency responses to red calls arriving within (up to and including) 8 minutes | 60 |
| Local Measure: Number of ambulance handovers within 15 minutes..... | 61 |
| Indicator 68: Number of ambulance handovers over one hour | 62 |
| Indicator 69: The percentage of patients who spend less than 4 hours in all major and minor emergency care (i.e. A&E) facilities from arrival until admission, transfer or discharge | 63 |
| Indicator 70: The number of patients who spend 12 hours or more in all hospital major and minor care facilities from arrival until admission, transfer or discharge | 64 |
| Indicator 71: The percentage of patients newly diagnosed with cancer, not via the urgent route, that started definitive treatment within (up to & including) 31 days of diagnosis (regardless of referral route)..... | 65 |
| Indicator 72: The percentage of patients newly diagnosed with cancer, via the urgent suspected cancer route, that started definitive treatment within (up to & including) 62 days of receipt of referral..... | 66 |
| Indicator 74: The percentage of mental health assessments undertaken within (up to and including) 28 days from the date of receipt of referral | 67 |
| Indicator 75: The percentage of therapeutic interventions started within (up to and including) 28 days following an assessment by LPMHSS..... | 68 |
| Indicator 76: The percentage of qualifying patients (compulsory and informal/voluntary) who had their first contact with an Independent Mental Health Advocacy (IMHA) within 5 working days of their request for an IMHA | 69 |
| INDIVIDUAL CARE – People in Wales are treated as individuals with their own needs and responsibilities | 70 |
| Indicator 82: Number of calls to the mental health helpline CALL (Community Advice and Listening Line) by Welsh residents per 100,000 of the population | 71 |
| Indicator 83: Number of calls to the Wales dementia helpline by Welsh residents per 100,000 of the population (age 40+) | 72 |
| Indicator 84: Number of calls to the DAN 24/7 helpline (drugs and alcohol) by Welsh residents per 100,000 of the population | 73 |
| Indicator 85: The percentage of health board residents in receipt of secondary mental health services (all ages) who have a valid care and treatment plan (CTP) | 74 |
| Indicator 86: All health board residents who have been assessed under part 3 of the mental health measure to be sent a copy of their outcome assessment report up to and including 10 working days after the assessment has taken place..... | 75 |
| OUR STAFF AND RESOURCES – People in Wales can find information about how their NHS is resourced and make careful use of them..... | 76 |
| Indicator 88: The percentage of patients who did not attend a new outpatient appointment (for selected specialties) | 77 |
| Indicator 89: The percentage of patients who did not attend a follow-up outpatient appointment (for selected specialties)..... | 78 |
| Indicator 90: Quantity of biosimilar medicines prescribed as a percentage of total `reference` product plus biosimilar | 79 |
| Indicator 92: Elective caesarean rate | 80 |
| Local Measure: Theatre efficiency | 81 |
| Indicator 93: Percentage of headcount by organisation who have had a Personal Appraisal and Development Review (PADR)/medical appraisal in the previous 12 months (excluding doctors and dentists in training) | 82 |
| Indicator 96: Percentage compliance for all completed Level 1 competencies within the Core Skills and Training Framework by organisation | 83 |
| Indicator 97: Percentage of sickness absence rate of staff | 84 |
| Commissioning: Cwm Taf Residents waiting at other health boards for treatment – Referral to Treatment (RTT) | 85 |
| Commissioning continued: Cwm Taf Residents waiting at other health boards for treatment – Referral to Treatment (RTT) | 86 |
| GLOSSARY | 87 |
| GLOSSARY Continued | 88 |

Indicator 1: Of those women who had their initial assessment and gave birth within the same health board, the percentage of pregnant women who gave up smoking during pregnancy (by 36-38 weeks of pregnancy)

| Outcome: My children have a good healthy start in life | | Executive Lead: Director of Public Health | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

How are we doing, what actions are we taking?

How are we doing?

Indicator 2: Uptake for CTMUHB during Apr-Jun 2019 was 96.9%, which remains above target.

Indicator 3: Uptake for CTMUHB during Apr-Jun 2019 was 91.7%, which remains below target.

What actions are we taking?

Pilot Sept-March 2019 - Missed 2 immunisation appointments documentation is being highlighted to Health Visiting Service from Child health to improve uptake in children who have incomplete immunisations up to age 5. Plans for a focus group to meet to look at time scales: 1. That health visitors need to respond by, 2. For the pilot's completion/point of evaluation

The School Nursing service has plans to devise a letter to send to parents at the school entry health review (4 years old rising 5) where immunisations are outstanding, particularly MMR

Child Health printing off lists of children with incomplete immunisations status by age 5. Lists are being sent to Health visitors and GP's.

What are the main areas of risk?

- Potential of outbreaks in local area if stats remain below 95% target
- Confirmed outbreak of Mumps in England by PHE (March 2019 - [BBC News](#))
- Confirmed outbreak of Mumps in Cardiff by PHW (April 2019 - [BBC Wales News](#))
- 'Should vaccinations be compulsory?' by Hugh Pym, Health Editor (September 2019 - [BBC News](#))
- 'Vaccinations: No plans to make them compulsory in Wales' (September 2019 - [BBC News](#))

Indicator 2: Uptake was 95.8% for Wales during Apr-Jun 2019 (a 0.5% increase; was 95.3% during Jan-Mar 2019), so CTMUHB (96.9%) continues to exceed this by 1.1%

Indicator 3: Uptake was 92.4% for Wales during Apr-Jun 2019 (no change; was 92.4% during Jan-Mar 2019), so CTMUHB (91.7%) has seen a 0.7% decline

(PHW has been working closely with Powys Health Board on a data quality project looking into irregularities in data that have been identified. A problem with one of the algorithms meant that when a child left a health board, not all of the data went with them. A fix has been rolled out and PHW is looking to work with CTMUHB in the future to carry out similar audits. PHW has explained that this fix will mean that percentage uptake will increase in the areas that were involved)

| Cwm Taf Morgannwg | | | | | <p>Cwm Taf Primary Care - as at 24 April 2019</p> <p>Uptake in those 65 years and older in CTUHB was 67.1% (68.2% Wales average). Uptake in those under 65 years with clinical risk in CTUHB was 40.0% (44.0% Wales average) (see note 1)</p> <p>Cwm Taf Staff Uptake among staff with direct patient contact (<i>to end of Mar 19</i>) was 50.9% (55.0% Wales average). Uptake among total staff (<i>to end of February 2019</i>) was 48.0% (53.4% Wales average).</p> <p>What actions are we taking?</p> <ul style="list-style-type: none">• Distinction between strategic and operational immunization groups, and separation of community and staff flu plans, should improve oversight and engagement.• Staff Flu vaccination workshop undertaken in May 2019 to evaluate the 2018/19 programme and plan for 2019/20, further engaging with members of the Board and Senior Managers.• Staff Flu evaluation workshop outcomes to be submitted to execs in SBAR. Including requests to support improving of data collection, peer vaccinator numbers and financial resources for an ambitious campaign for 2019/20.• Learning from the 2018/119 staff campaign will be incorporated into an updated staff flu plan for 2019/20 campaign.• An enhanced service for vaccinating care home staff is now in place.• GP practices and clusters will continue to receive personalised reports to incentivise further uptake efforts.• Flu ordering scoping piece of work underway to support GPs with achieving targets by assessing what they have ordered against their denominators. This will also support the facilitation of vaccine transfer between practices to enable practices who have run out of to continue vaccinating where there is need.• Peer vaccinator training sessions booked across sites in CTMUHB. Awaiting outcomes of SBAR to execs before request for nominations can be rolled out.• The Immunisation Team have collaborated with Public Health to ensure Peer Vaccinators and staff flu are incorporated into as many IMTP plans in the health board as possible• Plans to continue with successful incentive used 2018/19 which included: a voucher for a free tea/coffee in the HB, a pen and a lanyard when they have their flu vaccination. Hopes to extend our incentives, dependant on outcomes of SBAR to execs• Scoping work being undertaken to look at how much GPs are using the free text service available via NWIS with the hope to promote usage of the service to remind those eligible for flu to be vaccinated. Text reminders are recommended in NICE guidelines for improving flu uptake.• Sharing innovative practice in Immunisation Update around children’s flu, encouraging practices to put on ‘Fluenz parties’• Sharing of uptake data with 3rd sector health link to promote vaccination with the over 65s in practices where uptake is the lowest | <table><tr><th></th><th colspan="3">ABMU</th><th colspan="3">AB</th><th colspan="3">BCU</th></tr><tr><th></th><th>2015/16</th><th>2016/17</th><th>2017/18</th><th>2015/16</th><th>2016/17</th><th>2017/18</th><th>2015/16</th><th>2016/17</th><th>2017/18</th></tr><tr><td>Over 65s</td><td>64.6%</td><td>65.0%</td><td>68.2%</td><td>67.7%</td><td>68.1%</td><td>69.8%</td><td>68.7%</td><td>68.7%</td><td>70.6%</td></tr><tr><td>Under 65s in the at risk group</td><td>43.4%</td><td>43.7%</td><td>46.7%</td><td>49.4%</td><td>49.7%</td><td>50.8%</td><td>49.3%</td><td>49.3%</td><td>51.6%</td></tr><tr><td>Pregnant women*</td><td>44.1%</td><td>81.5%</td><td>93.3%</td><td>43.7%</td><td>69.8%</td><td>72.5%</td><td>50.3%</td><td>75.3%</td><td>65.2%</td></tr><tr><td>Healthcare workers**</td><td>54.6%</td><td>57.4%</td><td>58.5%</td><td>41.4%</td><td>52.1%</td><td>58.0%</td><td>43.2%</td><td>50.3%</td><td>55.1%</td></tr><tr><td>No of pregnant women immunised</td><td>1980</td><td>1851</td><td>1911</td><td>2476</td><td>5422</td><td>2621</td><td>3673</td><td>3579</td><td>3878</td></tr></table> <table><tr><th></th><th colspan="3">C&V</th><th colspan="3">HDda</th><th colspan="3">Powys</th></tr><tr><th></th><th>2015/16</th><th>2016/17</th><th>2017/18</th><th>2015/16</th><th>2016/17</th><th>2017/18</th><th>2015/16</th><th>2016/17</th><th>2017/18</th></tr><tr><td>Over 65s</td><td>68.9%</td><td>69.0%</td><td>71.0%</td><td>63.9%</td><td>63.4%</td><td>65.0%</td><td>64.3%</td><td>63.9%</td><td>66.3%</td></tr><tr><td>Under 65s in the at risk group</td><td>48.3%</td><td>48.3%</td><td>49.0%</td><td>43.2%</td><td>42.3%</td><td>42.9%</td><td>44.2%</td><td>46.0%</td><td>47.9%</td></tr><tr><td>Pregnant women*</td><td>51.8%</td><td>87.2%</td><td>77.2%</td><td>42.7%</td><td>87.5%</td><td>54.8%</td><td>53.5%</td><td>85.7%</td><td>100.0%</td></tr><tr><td>Healthcare workers**</td><td>46.8%</td><td>53.0%</td><td>64.7%</td><td>52.8%</td><td>47.0%</td><td>60.6%</td><td>60.1%</td><td>64.0%</td><td>65.4%</td></tr><tr><td>No of pregnant women immunised</td><td>2602</td><td>2659</td><td>2614</td><td>1278</td><td>1208</td><td>1265</td><td>643</td><td>617</td><td>647</td></tr></table> <table><tr><th></th><th colspan="3">CT</th><th colspan="3">Morgannwg</th><th colspan="3">CTM</th></tr><tr><th></th><th>2015/16</th><th>2016/17</th><th>2017/18</th><th>2015/16</th><th>2016/17</th><th>2017/18</th><th>2015/16</th><th>2016/17</th><th>2017/18</th></tr><tr><td>Over 65s</td><td>65.0%</td><td>64.9%</td><td>67.7%</td><td></td><td></td><td></td><td></td><td></td><td></td></tr><tr><td>Under 65s in the at risk group</td><td>45.9%</td><td>45.2%</td><td>46.8%</td><td></td><td></td><td></td><td></td><td></td><td></td></tr><tr><td>Pregnant women*</td><td>66.7%</td><td>57.4%</td><td>69.8%</td><td></td><td></td><td></td><td></td><td></td><td></td></tr><tr><td>Healthcare workers**</td><td>50.4%</td><td>47.2%</td><td>53.1%</td><td></td><td></td><td></td><td></td><td></td><td></td></tr><tr><td>No of pregnant women immunised</td><td>1003</td><td>971</td><td>986</td><td></td><td></td><td></td><td></td><td></td><td></td></tr></table> <table><tr><th></th><th colspan="3">All Wales</th></tr><tr><th></th><th>2015/16</th><th>2016/17</th><th>2017/18</th></tr><tr><td>Over 65s</td><td>66.6%</td><td>66.7%</td><td>68.8%</td></tr><tr><td>Under 65s in the at risk group</td><td>46.9%</td><td>46.9%</td><td>48.5%</td></tr><tr><td>Pregnant women*</td><td>47.1%</td><td>76.8%</td><td>72.7%</td></tr><tr><td>Healthcare workers**</td><td>47.3%</td><td>51.5%</td><td>57.9%</td></tr><tr><td>No of pregnant women immunised</td><td>13655</td><td>13410</td><td>13922</td></tr></table> <p>Uptake in the above reported categories has decreased on last year and continues to lag behind the all-Wales average in those under 65 years with clinical risk.</p> <p>What are the main areas of risk?</p> <ul style="list-style-type: none">• Persisting myths around immunisation in the community.• Another new vaccine choice for 2019/20 –concerns of possible delays/staggered deliveries as happened in 2018/19• Capacity within primary care to increase vaccination uptake.• Attaining the increased 60% healthcare worker target for 2019/20 represents an additional challenge requiring high levels of directorate support.• There is a risk we will not receive the number of peer vaccinator nominations we need for a successful 2019/20 campaign• WHC for flu 2019/20 mentions that employers will need to risk assess unvaccinated staff working in high risk areas. No further guidance received from Public Health on this yet. There is a risk of significant disruption to services based on the recommendations public health makes related to this.• Risk that sign off from execs may be delayed with other ongoing issues in the HB, having an impact on the Immunisation Service being able to take timely action for 2019/20 staff flu campaign | | | | | | ABMU | | | AB | | | BCU | | | | 2015/16 | 2016/17 | 2017/18 | 2015/16 | 2016/17 | 2017/18 | 2015/16 | 2016/17 | 2017/18 | Over 65s | 64.6% | 65.0% | 68.2% | 67.7% | 68.1% | 69.8% | 68.7% | 68.7% | 70.6% | Under 65s in the at risk group | 43.4% | 43.7% | 46.7% | 49.4% | 49.7% | 50.8% | 49.3% | 49.3% | 51.6% | Pregnant women* | 44.1% | 81.5% | 93.3% | 43.7% | 69.8% | 72.5% | 50.3% | 75.3% | 65.2% | Healthcare workers** | 54.6% | 57.4% | 58.5% | 41.4% | 52.1% | 58.0% | 43.2% | 50.3% | 55.1% | No of pregnant women immunised | 1980 | 1851 | 1911 | 2476 | 5422 | 2621 | 3673 | 3579 | 3878 | | C&V | | | HDda | | | Powys | | | | 2015/16 | 2016/17 | 2017/18 | 2015/16 | 2016/17 | 2017/18 | 2015/16 | 2016/17 | 2017/18 | Over 65s | 68.9% | 69.0% | 71.0% | 63.9% | 63.4% | 65.0% | 64.3% | 63.9% | 66.3% | Under 65s in the at risk group | 48.3% | 48.3% | 49.0% | 43.2% | 42.3% | 42.9% | 44.2% | 46.0% | 47.9% | Pregnant women* | 51.8% | 87.2% | 77.2% | 42.7% | 87.5% | 54.8% | 53.5% | 85.7% | 100.0% | Healthcare workers** | 46.8% | 53.0% | 64.7% | 52.8% | 47.0% | 60.6% | 60.1% | 64.0% | 65.4% | No of pregnant women immunised | 2602 | 2659 | 2614 | 1278 | 1208 | 1265 | 643 | 617 | 647 | | CT | | | Morgannwg | | | CTM | | | | 2015/16 | 2016/17 | 2017/18 | 2015/16 | 2016/17 | 2017/18 | 2015/16 | 2016/17 | 2017/18 | Over 65s | 65.0% | 64.9% | 67.7% | | | | | | | Under 65s in the at risk group | 45.9% | 45.2% | 46.8% | | | | | | | Pregnant women* | 66.7% | 57.4% | 69.8% | | | | | | | Healthcare workers** | 50.4% | 47.2% | 53.1% | | | | | | | No of pregnant women immunised | 1003 | 971 | 986 | | | | | | | | All Wales | | | | 2015/16 | 2016/17 | 2017/18 | Over 65s | 66.6% | 66.7% | 68.8% | Under 65s in the at risk group | 46.9% | 46.9% | 48.5% | Pregnant women* | 47.1% | 76.8% | 72.7% | Healthcare workers** | 47.3% | 51.5% | 57.9% | No of pregnant women immunised | 13655 | 13410 | 13922 |

Indicator 6: The percentage of adult smokers who make a quit attempt via smoking cessation services

Outcome: I am healthy and active and do the things to keep myself healthy

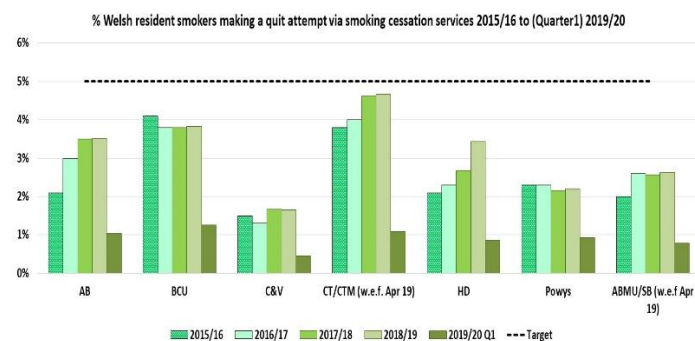

Executive Lead: Director of Public Health

Period: To Quarter 1 2019/20

Target: 5% Annual Target

Current Performance:

Cwm Taf Morgannwg

Cwm Taf

As above to 2018/19

Bridgend

Data not currently available

How are we doing, what actions are we taking?

To achieve 5% during 2019/20 we required 3,500 smokers to be treated via the range of available cessation services. Data for Q1 shows a total of 774 treated smokers via the following cessation services, and includes data for the Bridgend area:

Help Me Quit for Community – 159
Level 3 Community Pharmacy – 549
Help Me Quit for Baby – 32
Help Me Quit in Hospital – 34

Data for Quarter 2 of 2019/20 will be available in December 2019.

What actions are we taking?
Integration of the range of smoking cessation services within the Help Me Quit family is a priority following the recent transfer of 'Help Me Quit for Community' staff to Health boards from Public Health Wales

What are the areas of risk?
Service funding for Help Me Quit for Baby (MAMSS)

Benchmarking: how do we compare?

| % Welsh resident smokers who make a quit attempt via smoking cessation services | | | | | | | | |
|---|-------|-------|-------|------------------------|-------|-------|-------------------------|-------|
| | AB | BCU | C&V | CT/CTM (w.e.f. Apr 19) | HD | Powys | ABMU/SB (w.e.f. Apr 19) | Wales |
| 2019/20 Q1 | 1.04% | 1.26% | 0.46% | 1.09% | 0.87% | 0.92% | 0.78% | 0.95% |
| 2018/19 | 3.51% | 3.82% | 1.66% | 4.66% | 3.44% | 2.21% | 2.63% | 3.21% |
| 2017/18 | 3.49% | 3.79% | 1.67% | 4.61% | 2.67% | 2.16% | 2.56% | 3.11% |
| 2016/17 | 3.00% | 3.80% | 1.30% | 4.00% | 2.30% | 2.30% | 2.60% | |
| 2015/16 | 2.10% | 4.10% | 1.50% | 3.80% | 2.10% | 2.30% | 2.00% | |
| Target | 5.00% | 5.00% | 5.00% | 5.00% | 5.00% | 5.00% | 5.00% | 5.00% |

How do we compare with our peers?
Data for Q1 of 2019/20 shows a performance of 1.09% towards the 5% financial year end target. It is not possible to compare this performance with last year because of the recent health board boundary change.

Indicator 7: The percentage of those smokers who are CO-validated as quit at 4 weeks

Outcome: I am healthy and active and do the things to keep myself healthy

Executive Lead: Director of Public Health

Period: To Quarter 1 2019/20

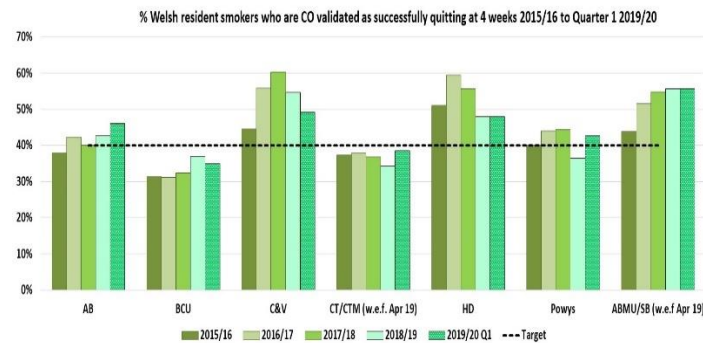

Target: 40% Annual Target

Avoidable, amenable & preventable mortality are classified according to ONS definitions;
amenable (treatable) mortality - deaths that could be avoided through timely and effective healthcare
preventable mortality - deaths that could be avoided by public health interventions
avoidable mortality - deaths that are amenable, preventable or both, where each death is counted only once
Source: Office for National Statistics
<https://www.ons.gov.uk/peoplepopulationandcommunity/healthandsocialcare/causesofdeath/bulletins/avoidablemortalityinenglandandwales/2017>

Across the seven Welsh Health Boards, Cwm Taf had the highest rate of amenable mortality during 2017 although a reduction has been seen from 2015, while Powys Teaching Health Board had the lowest.

How are we doing, what actions are we taking?

Sepsis compliance metrics are reported to Welsh Government on a monthly basis. Outreach input is now a formal part of the doctor and nurse orientation programme.

Outreach team continue to promote the work of the RRAILS and AKI groups to improve patient safety and care and there is now 24/7 cover for the whole Health Board. Suspicion of infection leads to sepsis screening and delivery of sepsis 6 of which compliance is measured by the Outreach team.

There is a well-attended multi-disciplinary quarterly group engaged with the national programme.

Working with maternity to produce sepsis guideline and working with District Nursing team to provide NEWS charts and observation equipment.

Education of all frontline HCPs via a mix of induction, rolling programmes and ward based targeted training.

Establishment of DRIPS meetings in both ED's to regularly review response to acute deterioration.

Risks are:

- Engagement of staff who are increasingly finding difficulty in being released from clinical areas for training.
- Outreach team has no capacity to provide teaching when clinical areas take priority.

The pharmacy team continue to hold awareness and training sessions as well as a continuation of a number of improvement projects.

VTE risk assessment compliance is monitored via monthly Pharmacy audits with immediate feedback provided to the Ward Sister.

The RCAs are informing learning and improvement with regards to prescribing and administration timeliness.

Qlik Sense App developed to allow close monitoring of potential HATs.

Clinical Directors with MDTs to ensure completion of the VTE risk assessments and prophylaxis, prescribing and administration as per local guidelines. To monitor via local Quality and Safety meetings and feedback learning to the VTE Steering group.

The Clinical Audit Facilitator who has taken responsibility for the management of the VTE/HAT process is establishing meetings with the lead clinicians to review all HAT cases.

How are we doing, what actions are we taking?

CTMUHB have the highest prescribing rates of antimicrobials in primary care in Wales. However CTMUHB have introduced prescribing guidelines to improve the choice of antimicrobials prescribed and this has demonstrated improvement e.g. compliance with the new primary care UTI treatment guidelines is good with current audited practices achieving around 70% compliance. Recent data in FY 2018 has shown a reduction in the volume of prescribing of both total antibiotics, and specifically broad spectrum antibiotics:

| Indicator | 2017/18 Quarterly trend | CTUHB Position in Wales (1 st = best performing HB) | | Cwm Taf change 2017 v 2018 |
|---|----------------------------|--|--------------------|-------------------------------|
| | | March Quarter 2018 | March Quarter 2019 | |
| Antibacterial items per 1,000 PU | ▼ | 7 th | 7 th | -10.8% |
| 4c antimicrobial items per 1,000 patients | ▼ | 7 th | 7 th | -10.9% |

CTM have established an Antimicrobial Resistance & Health Care Associated Infection Delivery Group within the HB governance structure. There is an agreed & monitored action plan for both primary and secondary care led and delivered by the antimicrobial pharmacists.

Actions include:

New prescribing guidelines accessible via phone APPs and a quick reference guideline for GPs.
GP practice audits of antimicrobial prescribing with feedback and recommended tailored actions, clinical and public engagement with an outcome of behaviour change via education and training to GPs & community nurses.
Optimise management of urinary tract infection (UTI) in elderly people. Improve hydration of care home residents. Share best practice with carers and health care professionals on appropriate diagnosis of UTI in elderly and catheterised persons. Stop inappropriate antibiotic prophylaxis for UTI.
Develop real time AMR monitoring dashboard with GP practice level data.

Benchmarking: how do we compare?

Data not currently available

How are we doing, what actions are we taking?

The Cwm Taf Morgannwg UHB 2019/20 reduction expectation for E.coli bacteraemia is to achieve a rate of less than or equal to 67.00 per 100,000 population. This equates to an average of less than 25 E.coli bacteraemia per month and less than 299 for the whole financial year (FY).

7 months into the 2019/20 reduction expectation period, the provisional rate of E.coli bacteraemia in Cwm Taf Morgannwg UHB is 94.51 per 100,000 population. This equates to an average of approximately 35 per month and based on the current trajectory, a total of approximately 422 for the FY. To achieve the 2019/20 reduction expectation the average number of E.coli bacteraemia per month for the remaining 5 months must be less than 11.

The IPC team are discussing all E.coli bacteraemia weekly to identify preventable sources. A collaborative has been formed to identify interventions in primary and secondary care which will support the reduction expectation.

Poor antimicrobial stewardship, poor hand hygiene and poor management of invasive devices.

Benchmarking: how do we compare?

Cumulative number of cases of E.coli per 100,000 population (Apr to Oct 2019)

7 months into the 2019/20 reduction expectation period, the provisional rate of E. coli bacteraemia in Wales is 82.39 per 100,000 population. This equates to an average of approximately 216 per month. Based on the current trajectory, a total of approximately 2592 E. coli bacteraemia cases is projected for the FY. Wales is not currently on target to achieve the 2019/20 reduction expectation. To achieve the 2019/20 reduction expectation the average number of E. coli bacteraemia per month for the remaining 5 months must be less than 119. None of the 6 major acute health boards are on target to achieve the reduction expectation.

Indicator 19: Cumulative rate of laboratory confirmed *S.aureus* bacteraemia (MRSA & MSSA) cases per 100,000 population

Outcome: I am safe and protected from harm through high quality care, treatment and support

How are we doing, what actions are we taking?

The Cwm Taf Morgannwg UHB 2019/20 reduction expectation for *S. aureus* bacteraemia is to achieve a rate of less than or equal to 20.00 per 100,000 population. This equates to an average of less than 8 *S. aureus* bacteraemia per month and less than 90 for the whole financial year (FY).

7 months into the 2019/20 reduction expectation period, the provisional rate of *S. aureus* bacteraemia in Cwm Taf Morgannwg UHB is 28.04 per 100,000 population. This equates to an average of approximately 10 per month and based on the current trajectory, a total of approximately 125 for the FY. To achieve the 2019/20 reduction expectation the average number of *S. aureus* bacteraemia per month for the remaining 5 months must be less than 4.

All MRSA bacteremias are investigated by the IPCT and a RCA is performed for all line related bacteremias.

Improvement work is being carried out to improve compliance with MRSA screening in our A&E departments and admission wards.

60% of the MSSA bacteraemia are identified <48 hours post admission.

Poor antimicrobial stewardship. Poor hand hygiene. Poor compliance with MRSA screening and management of invasive devices. Poor hand hygiene.

Benchmarking: how do we compare?

7 months into the 2019/20 reduction expectation period, the provisional rate of *S. aureus* bacteraemia in Wales is 26.32 per 100,000 population. This equates to an average of approximately 69 per month. Based on the current trajectory, a total of approximately 828 *S. aureus* bacteraemia cases is projected for the FY. Wales is not currently on target to achieve the 2019/20 reduction expectation. To achieve the 2019/20 reduction expectation the average number of *S. aureus* bacteraemia per month for the remaining 5 months must be less than 29. None of the 6 major acute health boards are on target to achieve the reduction expectation.

Indicator 20: Cumulative rate of laboratory confirmed *C.difficile* cases per 100,000 population

Outcome: I am safe and protected from harm through high quality care, treatment and support

How are we doing, what actions are we taking?

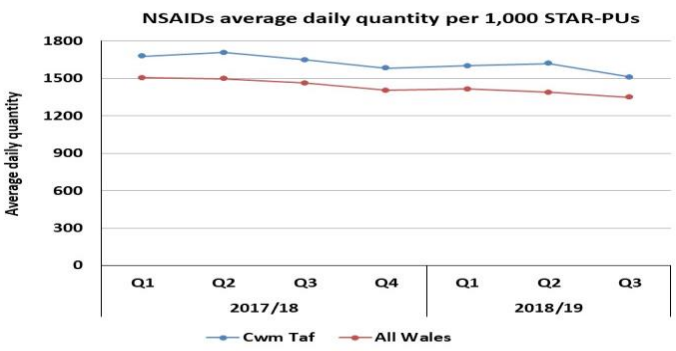

The Cwm Taf Morgannwg UHB 2019/20 reduction expectation for C. difficile is to achieve a rate of less than or equal to 21.00 per 100,000 population. This equates to an average of less than 8 C. difficile per month and less than 94 for the whole financial year (FY).

7 months into the 2019/20 reduction expectation period, the provisional rate of C. difficile in Cwm Taf Morgannwg UHB is 32.27 per 100,000 population. This equates to an average of approximately 12 per month and based on the current trajectory, a total of approximately 144 for the FY. To achieve the 2019/20 reduction expectation the average number of C. difficile per month for the remaining 5 months must be less than 2.

Benchmarking: how do we compare?

7 months into the 2019/20 reduction expectation period, the provisional rate of C. difficile in Wales is 27.95 per 100,000 population. This equates to an average of approximately 73 per month. Based on the current trajectory, a total of approximately 879 C. difficile cases is projected for the FY. Wales is not currently on target to achieve the 2019/20 reduction expectation. To achieve the 2019/20 reduction expectation the average number of C. difficile per month for the remaining 5 months must be less than 55. One of the 6 major acute health boards is on target to achieve the reduction expectation (Aneurin Bevan UHB).

How are we doing, what actions are we taking?

Alerts: A total of 9 Alerts have been received. The Health Board is compliant with 8 of these Alerts.

PSA008 – CE strips non marked being used (WG agreement) so HB remains non-compliant. A review is currently being undertaken across NHS Wales by the Welsh Risk Pool to identify a way forward.

Notices: A total of 50 Notices have been received. The Health Board is non-complaint with 3 of these Notices.

PSN030 –An all Wales self-assessment tool has been completed. All of Wales is non-compliant with this Notice and the Health Board has taken actions to minimise the risk.

PSN046 - The Health Board's Bladder and Bowel Health Service deliver a management of bowel dysfunction course throughout the Organisation. Uptake of training by ward based requires improvement.

Every clinical area, District Nurse base, Residential & Nursing Home has a welcome to the bladder & bowel health service resource file.

The Guideline is being reviewed and a Standard Operating Procedure is being developed which will included more detailed information highlighted in the notice. This needs to be approved before compliance can be confirmed.

PSN049 – Progress and action being taken to date include:

- includes the establishment of a multi-professional group across all sites to take forward the recommendations of the notice
- Revised draft guideline have been circulated of The which include paediatric management, along with information, forms and a checklist for movement and transfer of patients.
- Exploration of whether the funding is still available from the Critical care network the establishment of a multi-disciplinary Tracheostomy Team.
- External training 'Train the Trainer' to be attended by Health Board Leads.

Quarter 2, 2018/19 - 120 serious incidents and one never

Quarter 3, 2018/19 - 109 serious incidents and no never events.

Quarter 4, 2018/19 - 58 serious incidents and no never events.

Quarter 1, 2019/2020 – 66 serious incidents reported and no never events.

Quarter 2, 2019/2020 – 69 Serious Incidents reported and 1 never event.

The highest category of serious incidents reported relate to slip, trip or fall. Improvement work is being undertaken to reduce the risk of inpatient falls.

As at the 31st October 2019 there were 58 closure forms outstanding outside of timescale. The highest numbers are Acute medicine, A&E, Mental health and Obstetrics and Gynaecology.

The Patient Safety Team monitor the number of incidents awaiting review and closure on a weekly basis. The Patient Safety Improvement Managers provide support within the Directorates via regular meetings with responsible Managers.

This information is formally reported to directorates on a monthly and quarterly basis.

This is also reported to the executive team via the weekly patient safety meetings and also to the Quality Safety and Risk committee.

Ongoing work is being undertaken to ensure timely reporting, investigation and learning from Serious Incidents. The aim of work, which is being supported by the Delivery Unit is to strengthen and streamline investigations processes. An SI toolkit is being developed to support staff.

How are we doing, what actions are we taking?

It has been noted there has been low reporting of patient safety incidents on the NRLS. This was an administrative malfunction and has since been resolved.

A high reporting of no and low harm incidents is indicative of a robust safety culture within an Organisation. Moderate incidents reported within the Health Board are currently slightly above the Welsh average – this partly due to an inaccuracy in reporting.

Daily monitoring of moderate and severe incidents is undertaken by the Corporate Team to identify inaccuracies and correct reported incidents.

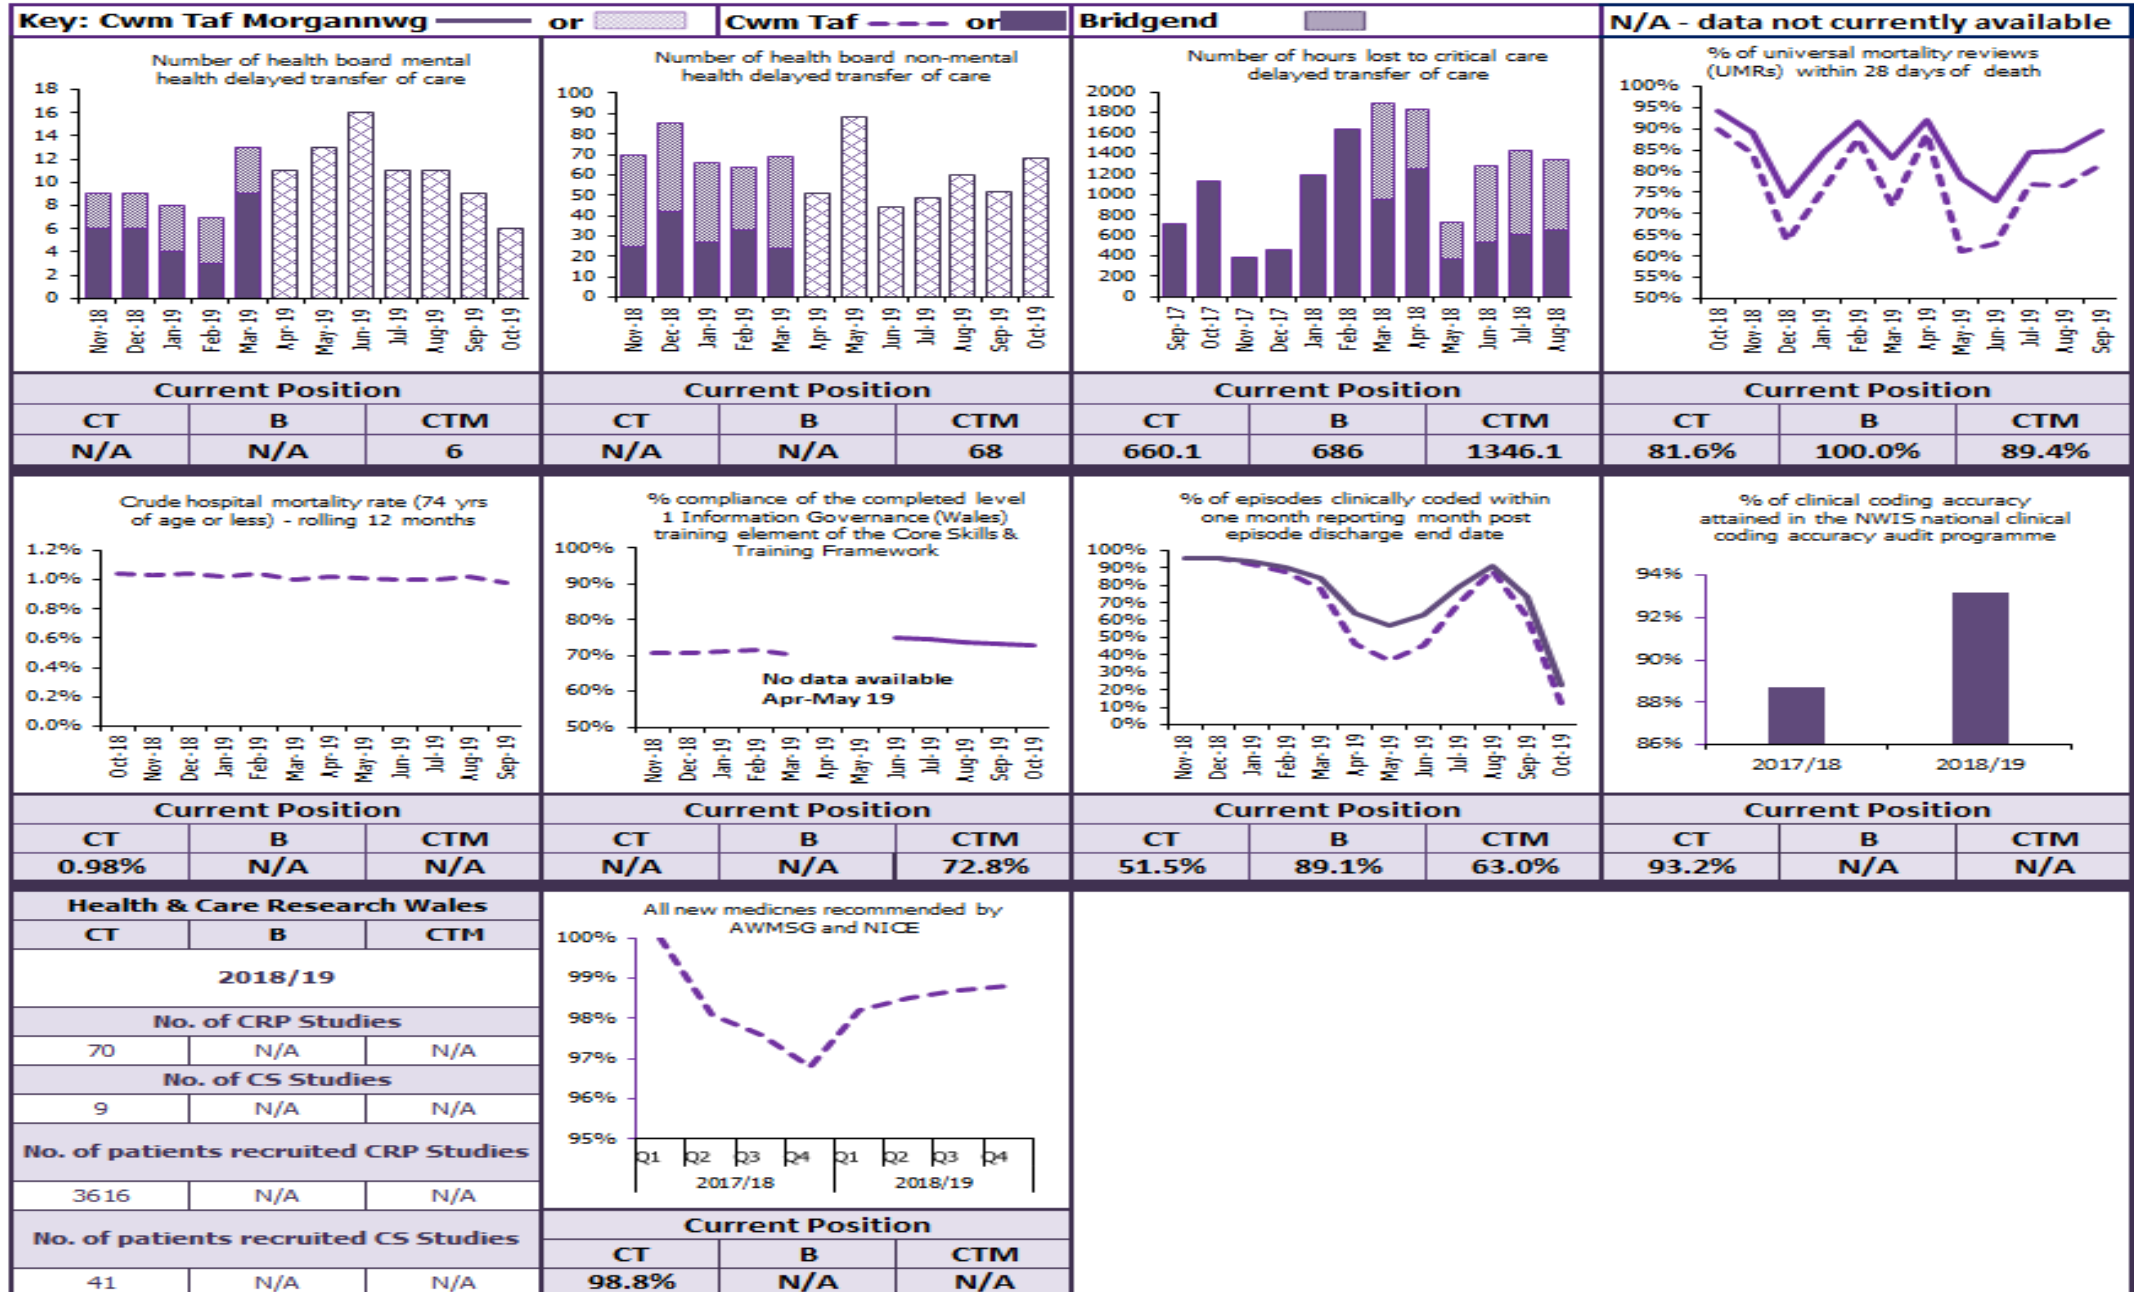

The top 3 reported categories of incidents during the period highlighted in the chart relate to pressure damage falls and delays. Of the top three incidents reported the majority resulted in no or low harm. Improvement work being undertaken in relation to these areas.

A Training Needs Analysis is currently being developed to assess the levels of training in relation to concerns management including patient safety incidents across the whole of the Health Board.

Cwm Taf Morgannwg

Cwm Taf to 31st March 2019

Bridgend to 31st March 2019

How are we doing, what actions are we taking?

The 2019/20 target is a 12 month reduction trend.

This month's position (October) shows 6 delays to transfers of care. This is a decrease from 9 in September and the service is reporting no delays in RGH which is a significant improvement in line with work undertaken by the locality team. Bridgend locality have maintained a significant improvement seen two months ago.

There is 1 person with a delay in rehabilitation services awaiting private provider. There are 5 delays in older peoples services, 2 are waiting for nursing place availability in care home of choice (EMI), 1 is selecting nursing care placement of choice (EMI), 1 is recorded as other and 1 person has mental capacity issues which are being managed accordingly.

All patients with a status of having a delayed transfer of care have progress towards discharge reviewed weekly by Senior Nurses and any issues that could be resolved with additional input are reported through to the Directorate team. Where necessary lack of progress is escalated to Local Authority Service Managers by ADO when required. A newly developed decision making Matrix for S117 placements in place with RCT is having a positive impact on reducing funding related delays.

The key picture this month relates to availability and choice of EMI nursing care homes and this will be monitored over the next few months as the sector capacity may need revisiting by board and Local Authorities.

How are we doing, what actions are we taking?

CTMUHB continues to work with our LA partners to manage the challenge of DToC's in a few undoing areas, listed below

Additionally to these ongoing issues, there was a significant spike in the delay of repatriation of 10 patient to the Caerphilly area this month, which were resolved shortly after Dtoc day.

Choice related issues: Care Home vacancies fluctuate from time to time, this month has seen an increase in the filling of vacancies for those individuals requiring either permanent or respite provision which has now impacted on choice related issues in our hospitals and increased our DToC position. We are vigorously implementing the choice protocol and asking families to choose vacancies further away from home and even outside the HB's footprint, families find this extremely difficult however we recognise the importance of discharging individuals in a timely way. Our demand for EMI has also increased more recently, it is an area that we have been working with providers to develop services but currently demand is high for this category.

Home care capacity: There continues to be high demand for home care packages as our LA's successfully support people with more complex care packages to live at home rather than in a care home. This continues to put pressure on supply and capacity in some areas of the county at "peak call" times. Providers continue to recruit to their services. Each Of the LA are working with their providers and in house services to minimise impact on delays awaiting commencement of home care packages.

Delays due to housing: There are a number of housing related delays this month. RCT has experienced a sustained increase in demand for housing and housing related support over the past 2 years, with a particular increase in demand for specialist and adapted housing. Work is being done to

Cont. to improve the supply of adapted housing through our Housing Partnerships. Work is required to ensure early identification of complex needs to ensure bespoke adaptations can be prioritised as early as possible to prevent delayed discharge. In addition, some clients who enter hospital when of no fixed abode are appropriately prioritised in the highest band but have encountered delays in the first quarter of 2019 when bidding via our choice based letting system as they wish to live in very high demand areas. We will work with colleagues to review the process for these clients to improve timely access to housing via the general needs register.

Delays due to Mental Capacity: We have over the past 2 years seen a significant and growing number of cases that require referral to the Court of Protection to confirm ongoing care arrangements (particularly placement into a care home when the person is stating they want to return home). The numbers requiring referral to the court to establish discharge destination in July and August is significant and reflects a more general trend across the service. Whilst there is often a delay between the application and the actual Court date we plan to work with the UHB to consider our procedures to look at ways of identifying cases that are likely to require a Legal process earlier in the discharge planning arrangements. There is an incredible amount of partnership work that occurs on a day to day, HB wide basis in putting patients first in addressing flow and resolving DToC.

Cwm Taf Morgannwg – Acute

Acute Delayed Bed Days Transfers of Care

The number of delayed bed days in acute settings had reduced over June and July but for reasons noted on the previous page increased during August.

The Health Board continues to work closely with each of the local authorities to ensure any delays are kept to a minimum.

Availability of community placements remains a challenge for those with complex and specialist needs.

Stimulating and developing the domiciliary care market to reduce delays for vulnerable patients to be discharged with an adequate and sustainable package of care.

Additional work with neighbouring LA's and HB's is required as the boundary change and current flow of admissions through POW highlights the need for additional processes to aid discharge and flow.

Local Measure: Critical Care – Delayed transfer of care

Outcome: Health care and support are delivered at or as close to my home as possible

Executive Lead: Chief Operating Officer

Period: Sep 2017 to Aug 2018

Target: 5%

Current Performance:

How are we doing, what actions are we taking?

Benchmarking: how do we compare?

Cwm Taf Morgannwg

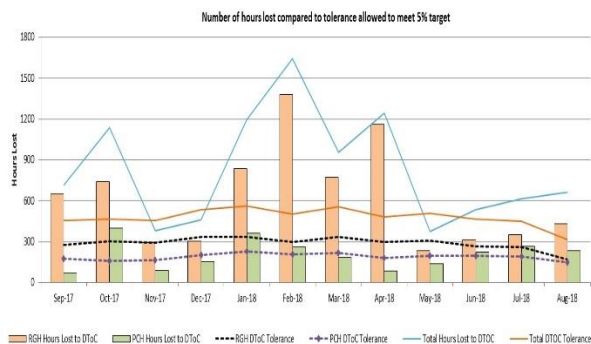

Data not currently available

From a critical care perspective the delays are calculated on a basis of total number of delayed hours as a percentage of the total number of hours used. The expected level of DToC by the National Critical Care Network is no more than 5%.

The main actions to be taken to keep DToC's 5% target is to ensure patient flow is working well. It is proven that when beds are available on the wards to discharge patients DToC reduces. We have now put Critical Care on the Emergency Pressures Escalation Chart so it highlights the visibility of critical care capacity.

How are we doing, what actions are we taking?

How are we doing? - For PCH & RGH, UMR performance has remained stable since April 2016. However, due to a lack of reviewer availability, performance dropped in PCH for June 2019. Some UMRs continue to be completed as an ongoing pilot of the medical examiner system by two pathologists in accordance with the agreed role of the ME in the Welsh Mortality Review process.

POW have a different system in place with UMR completed by the Clinical team at time of death. Plans are being made to change this system to the same as PCH & RGH. Information is currently being gathered on the resources required to achieve this.

Participation in Stage 2 remains reasonably stable despite there also being 2 different systems for this across CTMUHB.

The Post Stage 2 process has been further refined with a Stage 3 Panel in place, led by the AMD for Quality & Safety, to ensure that lessons learned are translated into effective changes in clinical practice.

What actions are we taking? -Discussions are due to take place to agree one system of undertaking Mortality reviews across CTMUHB. This is also linked to the implementation Medical Examiner system as well as implementation of a Mortality Module on Datix which will link with the QlikSense business intelligence tool to add value to our reporting mechanisms to Directorates and other clinical areas.

Datix Mortality module is currently in test stage.

What are the areas of risk? - There are continued risks to the performance particularly the support from primary care at Stage 1. This is too patchy and subject to staff shortages reported in that workforce. Ultimately Stage 1 will become a function of the Medical Examiner.

Risk of running 2 separate processes for Mortality review, which is currently being addressed. Plans are being made to change the POW process to the same as PCH & RGH.

Outcome: Interventions to improve my health are based on good quality and timely research and best practice

Executive Lead: Medical Director

Period: Oct 2018 to Sep 2019

Target: 12 Month Reduction Trend

Current Performance:

Cwm Taf Morgannwg

Data not currently available

How are we doing, what actions are we taking?

In order to provide a more up to date position for mortality index, the graphs represent the position from an extrapolation of local data from CHKS. Crude mortality is now the only measure of in-hospital death rates as RAMI has been removed from the Outcomes Framework with effect from April for 2016.

The metric had changed from total crude mortality to crude mortality age 75 years and less 2016/17 and from the 2017/18 Outcomes Framework measures age 74 or less.

There are currently a number of specific quality improvement projects being undertaken:

The systematic medical record reviews on the acute sites are continuing on a weekly basis. The process is evolving in readiness for the medical examiner system when introduced.

The systematic reviews of deaths in community hospitals commenced on a fortnightly basis (currently a monthly basis due to small numbers).

Mortality reviews follow a three stage process whereby Stage 1 is to screen out the expected deaths and Stage 2 is for more detailed review of unexpected deaths which could either prove to be unavoidable or proceed to Stage 3 for potential learning and improvement.

The All Wales Mortality Review Group is producing a new set of mortality indicators in line with the recommendations submitted to the Minister by Professor Stephen Palmer in 2015.

Benchmarking: how do we compare?

Cwm Taf does have higher crude mortality rates than Welsh Peers.

How are we doing, what actions are we taking?

0-40 years: the Health Board is on par with the All Wales mortality with very few deaths.

41-74 years: the Health Board reports higher % mortality than All Wales. Investigation of individual patients indicates this relates to those with a diagnosis of cancer, drug & alcohol related deaths. A high proportion of patients are coded with pneumonia (lung diseases), stroke & palliative care.

75 years and over: Deaths include pneumonias (lung diseases), stroke, heart failure, palliative care, sepsis and other age related diseases are observed. Cwm Taf's population has higher rates of deprivation associated with higher rates of crude mortality as well as having greater rates of co-morbidities.

Contributory factors are lifestyle issues like obesity, smoking, alcohol and drug use which are more prevalent in the Cwm Taf population. The ratio of emergency care to elective care is higher in Cwm Taf and it is known that emergency care has higher risks and mortality. There are also a higher proportion of patients presenting with later stage cancer. 65% of deaths in Cwm Taf take place in hospital compared to an All Wales average of 55.9% therefore further improvement is still required to support patients who wish to die outside of hospital. To address the contributory factors all Cwm Taf UHB local delivery plans have specific areas to address lifestyle issues and support early recognition and speedier management of illness, particularly in cancer.

Benchmarking: how do we compare?

Comparison of life expectancy and healthy life expectancy at birth, with Slope Index of Inequality (SII), Cwm Taf UHB, 2005-09 and 2010-14

Produced by Public Health Wales Observatory, using PHM & MYE (ONS), WHS & WIMD 2014 (WG)

The Measuring Inequalities (2016) report shows that at a population level people are living longer and longer in good health in Wales as a whole. However, the report also indicates at a national level that the difference between life expectancy between the most and least deprived areas of Wales shows no sign of reducing. This is called the Slope Index of Inequalities (SII).

The graph above compares life expectancy and healthy life expectancy for Cwm Taf. It provides a comparison between the time periods 2005/09 and 2010/14 and the variation in the Slope Index of Inequalities (SII). In Cwm Taf, it is a very positive sign that life expectancy and healthy life expectancy (2010-2014) have improved since the previous report (2005-2009). The inequality gap between the most and least deprived has narrowed across all of the parameters and this has not been seen in other parts of Wales. However, we still remain below the Wales averages and for male life expectancy in Rhondda Cynon Taf, the inequality gap has increased since the previous report from 7.4 years to 7.8 years demonstrating the variations within Cwm Taf.

Data not currently available

How are we doing, what actions are we taking?

Please note: data for CTM was not available for April and May 2019 due to ESR system issues as a result of the boundary change that took place 1st April 2019

Overall the compliance with the IG training has remained static for the last 12 months.

Figures are monitored at the Information Governance Group via the standard key performance indicators report. These figures are also submitted to the Quality, Safety & Risk Committee. In addition to this, training compliance is presented at the directorates Clinical Business Meetings to try and increase the uptake of this mandatory training.

We continue to hold monthly classroom sessions, promote the E-learning package and the requirement for training is also highlighted at the Corporate Induction session for new starters.

Areas of high risk are directorates that have high involvement with medical records, sensitive information and access to clinical systems. We monitor the trends where incidents occur – targeted areas of risk include, CAMHS and Mental Health.

Where incidents occur, enforcement action can be considered by the regulatory bodies (which can include a monetary penalty) where these have an effect on an individual. We continue to work towards the 85% target and will routinely monitor progress as set out above.

How are we doing, what actions are we taking?

The reported coded position for August is a slight improvement on the previous months. This is due to the fact that Bridgend clinical coding team are now able to assist with the shortfall in coding.

The clinical coding department at Royal Glamorgan Hospital is currently undergoing an external audit. The supervisor for Cwm Taf is assisting with the audit and will offer feedback to the coding department of the errors/anomalies found.

The Digitalisation Team are currently process mapping the flow of case notes with other departments and have been considering the effects it will have on clinical coding with the go live date estimated to begin in Royal Glamorgan Hospital in January 2020.

Clinical coders at the Princess of Wales site who would normally be supporting the coding service in Royal Glamorgan and Prince Charles, will in the future be able to access the casenote digitally which will prove cost effective, not having to transport cages of casenotes twice a week between hospital sites.

The clinical coding manager and the coding supervisor met with the Deputy Head of Midwifery last week to discuss the Local Coding Policies and also to discuss data quality issues. It was a productive meeting and are going to meet on a regular basis to improve the information and gain better understanding of the specialty.

Trainee clinical coders are now able to sit a pre-ACC test supported by NWIS, the paper has been written by the National Training Programme Manager to identify if candidates are prepared for the level of knowledge and concentration needed to sit the exam.

Benchmarking: how do we compare?

Unfortunately Cwm Taf Morgannwg are currently at 69.0% reported position April – August 2019. This is due to a number of factors, the I.T systems have been particularly poor over the past few months, Management has asked for a meeting with IT and WPAS to discuss what the technical issues have been that have caused the coding department to fall further behind with work load.

We have also been trying to identify where admissions and transfers have been transacted incorrectly on WPAS, creating spreadsheets to document the amount of time it is taking to deal with the omissions.

Sickness and absences have also been quite high the past four months, impacting even greater on productivity.

We are currently in discussion to secure additional funding in order to employ contract clinical coders to clear the backlog of coding.

How are we doing, what actions are we taking?

This week we are undergoing the first of the National Clinical Coding Audits at the Royal Glamorgan Hospital for 2019 – 2020, we are optimistic that the quality of our information stays above the 90% pass rate. We continue to carry out the data quality checks of the clinical coding to maintain the standard already achieved last year, and to have confidence in our coded data.

We have been in discussions with the Clinical Audit department regarding the low volumes of coded data for 2019/ 2020, working towards understanding the effect the uncoded episodes are having on their data validation for their National Audits,. It has been noted that the backlog of uncoded is the usual position for Clinical Coding to be in particularly the first quarter April-June as we were working toward achieving 2019/2020 target final submission by June 2020.

All Trainees are undergoing the full training programme to become competent clinical coders within a 2 year period.

We will have two members of staff that will be sitting the NCCQ exam in 2020.

It has been agreed that internal Audits and the NWIS audit in addition to productivity will form part of the PDR process for the Clinical Coding Team.

We will be sending three of our trainees on the National Clinical Coding Standards course in January.

Benchmarking: how do we compare?

Cwm Taf clinical coding department is pleased to have a 93.23% accuracy level, this is great improvement on 2017/18.

With our improved training programme in place for our Annex U and Band 3 trainee clinical coders we are confident we will be building a strong team for future years.

One of the supervisors is responsible for the training of junior staff at both Prince Charles Hospital and Royal Glamorgan Hospital. We have implemented a comprehensive training programme to support the needs of the trainees and when ready, achieve the ACC qualification. This process will provide the assurance that Cwm Taf Morgannwg, will in time, have a fully qualified team to deliver on coding quality and completeness.

Local Support and Delivery funding is provided to organisations to develop their own research infrastructure to support, deliver, promote and encourage high quality research. Funding is based on research activity for the previous three rolling years (activity based funding) i.e. the number of open Clinical Research portfolio (CRP) studies, number of participants recruited to CRP studies, number of Chief Investigators affiliated to the organisation and the number of clinical research fellows within the organisation. Each NHS Organisation in receipt of the Local Delivery and Support Funding is measured against key performance indicators set by the R&D Division, Welsh Government and these are reported on a quarterly basis. Organisations are expected to increase the number of studies open and adopted onto the clinical research portfolio (CRP) by 10% per annum and commercial studies by 5% and also the number of participants recruited to CRP and commercial studies by 10% and 5% respectively.

There has been excellent performance during the last year reflected in the number of participants being recruited into CRP studies with an increase of 55% in the number of participants recruited from the previous year. The target for non-recruiting CRP studies is set at 0%, which was also met in 2018-19. One of the performance metrics which the department did not meet during 2018-19 included the recruitment to time to target for CRP studies. It is a continuing priority for the R&D team to ensure that the appropriate research nurse and research officer support is allocated to studies in order to meet the recruitment targets, as well as ensuring that early discussions with Principal Investigators establish recruitment targets that are achievable.

During 2018/19, CTUHB exceeded the KPIs for the number of open commercial studies and for the number of participants recruited to CRP and commercial studies, the highest level of annual research activity in CTUHB to date. Undertaking commercial research provides an opportunity to increase R&D related income whereby pharmaceutical and medical device companies pay all necessary costs for the study to be undertaken, to include overheads and capacity building costs. The provision of the overheads and capacity building costs provide flexible funds that can be re-invested, as per appropriate financial practices, into research.

The Assistant Director for R&D, R&D Manager and R&D Finance Analyst attended the annual performance management meeting with the R&D Division, Welsh Government and the Director of Health and Care Research Wales Support Centre on Friday, 12th July. Welsh Government were pleased with the UHB's performance during 2018-19 to include the levels of research activity, the distribution of R&D funding and the Primary Care model of work that has been established across the UHB. The R&D team continue to prioritise the increase in non-commercial and commercial research activity in circulating potential studies and providing support to clinicians in completing feasibility questionnaires, attending site selection visits and the set up and delivery of the study. The R&D team are processing an increasing number of feasibility requests (expressions of interests, feasibility questionnaires) for both commercial and non-commercial companies. Further investment in the R&D infrastructure has resulted additional posts to set up, support and deliver CRP and commercial studies across Cwm Taf.

The strategic objective to increase the number of Chief Investigators aligned to the UHB and to increase the number of "in house" Chief Investigators and research leaders was also met. During 2018-19, there were 16.6 Chief Investigators affiliated to Cwm Taf UHB and 8 of these were in house.

Since April 1st, 2019 all research undertaken within the Bridgend boundary has been the responsibility of Cwm Taf Morgannwg UHB's R&D team. The boundary change has provided an exciting opportunity to develop the R&D infrastructure in Bridgend to provide support to research active professionals (to include secondary / primary / community care and population health) in the set up and delivery of existing CRP and commercial studies. There is also an opportunity to develop and progress their own research ideas with appropriate external funding and support from the CTMUHB R&D team.

Indicator 38 to 41 continued:

Outcome: Interventions to improve my health are based on good quality and timely research and best practice

Executive Lead: Medical Director

Period: 2018/19 **Cwm Taf University Health Board**

What are the areas of risk?

Support and investment is required from the Health Board to enable the organisation to continue to develop the infrastructure required to meet the targets and metrics set and performance managed by the Research and Development Division, Welsh Government and the UHB's own R&D strategy, delivery plan and ambition. This includes the further development of its Commercial research portfolio and scope for increasing the UHB's income generation and re-investment into research activities. Increasing this income will serve to complement the income currently provided from the NHS R&D allocation and successful grant applications.

Failure to invest / re-invest in the research infra-structure and maintain or increase the research activity, will result in a decreasing R&D income through grant funding and commercial studies and will be a risk to the success of the UHB's R&D ambitions and evidence based improvements in patient care.

The current Activity Based Funding formula and approach to NHS R&D funding is under review, for possible implementation in April 2020. A Task and Finish group has been set up to be chaired by the Health and Care Research Wales Director for Support and Delivery with representation from Health and Care Research Wales, Academia and the 2 of the NHS R&D Directors. Cwm Taf Morgannwg UHB's Assistant Director for R&D, with the other R&D Directors have raised a concern that there will not be representation from each of the NHS organisations. Cwm Taf UHB's Assistant Director for R&D has sought assurance from the Interim R&D Director at Welsh Government, that discussions will be open and fully transparent and that Cwm Taf Morgannwg will be given the opportunity to have a continual input into the proceedings. A draft engagement plan has been drafted in relation to the consultation process.

The development of a well-equipped, designated Clinical Research Facility that could provide dedicated clinical space for the recruitment and examination of patients consenting to participate in research remains a priority and would be a major step forward in developing Cwm Taf Morgannwg UHB's research portfolio, both commercial and non-commercial. This will optimise the UHB's income generation potential, but most importantly provide additional opportunities for the patients of Cwm Taf Morgannwg to gain access to new and innovative treatments and medical technologies. Development of such a facility would also strengthen the UHB's research infra-structure and reflect its University Health Board status. This programme of work is in setup and support will be sought from UHB Executives.

In addition to the development of the available physical space and accommodation, R&D activity could be increased if the capacity of the workforce could be optimised to ensure that research is central to their roles. This could be facilitated by the inclusion of research sessions in Consultant job plans through SPA. In addition the inclusion of research and the provision of time to undertake research in the job descriptions of the workforce. These alone would increase the research capacity considerably across the UHB, contributing to the improved quality of patient care, but also staff morale, recruitment and retention. With support from the Executives, Human Resources and Line Management this is achievable.

Due to the low volume of clinical trials of investigational medicinal products (cTIMPs) being hosted and sponsored by Cwm Taf Morgannwg a statutory inspection by the Medicines and Healthcare Products Regulatory Agency (MHRA), in relation to the conduct of Clinical Trials has not been required to date. As the clinical trial activity grows in Cwm Taf Morgannwg UHB, the likelihood of an MHRA inspection will increase. An NHS Organisation undergoing MHRA inspection is expected to demonstrate their compliance with Good Clinical Practice and the Clinical Trials Regulations. This includes ensuring training and records are in place for staff, ensuring clarity of roles and responsibilities and ensuring adherence to trial documentation e.g. protocol. "Preparing Teams for Regulatory Inspection – MHRA Inspection Readiness" training took place at Prince Charles Hospital on Thursday 12th July 2018. This training was provided by Wendy Fisher Consulting covering the role of MHRA and inspection planning for clinical trials. 16 members of staff attended.

On completion of a research project, the R&D study file and site file is required to be archived. The length of time is dependent upon the type of study but records must be stored for at least 10 years from project completion. The files should be stored in lockable cabinets that are fire proof and waterproof. R&D files are currently stored in the Plant Room in Royal Glamorgan Hospital but they have been deemed a fire hazard and are required to be moved. It is envisaged that there will be sufficient space for archiving with the development Clinical Research Facility.

Cwm Taf UHB had the largest increase in the number of participants recruited to CRP studies during 2018-19 and recruited the 2nd highest number of participants to CRP studies.

Compared to some NHS Organisations, Cwm Taf UHB appears to have low levels of commercial activity but there has been a significant growth in Cwm Taf UHB's research activity over the last 3 years. Other factors should also be taken into consideration to enable the appropriate comparison against other Health Board's such as the size, infrastructure, patient population and funding received from Welsh Government. All of these factors will affect the Health Board's ability to increase the number of CRP and commercial studies.

The R&D team remain dedicated to exceeding its KPIs to ensure that the opportunity to increase the ABF allocation and other income avenues to invest in the R&D infrastructure are maximised.

Bridgend

Data not currently available

How are we doing, what actions are we taking?

The measure for postponed admitted procedures has changed with the 2018/19 Outcomes Framework from "Patients that should their operations be cancelled on more than one occasion, with less than 8 days' notice then they would receive treatment within 14 days of the second cancellation, or at the patient's earliest convenience" to "Number of procedures postponed either on the day or the day before for specified non-clinical reasons".

The data for this measure is extrapolated from the Health Board's Welsh PAS application at the end of each month and now includes Princess of Wales Hospital postponements from April 2019.

The Health Board is raising awareness of this measure amongst patient booking staff and ensuring that data capture accurately reflects the discussions being undertaken with patients. This will ensure increased compliance with this measure.

One of the main issues relates to patients being booked prior to being declared fit by pre-assessment. Booking staff have been instructed to follow Health Board guidance in this area. Pre-assessment delays, which attribute to this issue are being addressed as part of the planned care work-streams.

Periods of patient unavailability need to be accurately recorded for this measure to be calculated precisely. Pre-assessment delays need to be minimised.

Benchmarking: how do we compare?

Cwm Taf is performing better than its peers apart from Powys.

Indicator 44: Number of patients aged 75 and over with an AEC (Anticholinergic Effect on Condition) of 3 or more for items on active repeat, as a percentage of all patients aged 75 years and over

How are we doing, what actions are we taking?

Health Boards are required to monitor numbers and percentages of patients recorded with Dementia.

Available data for people within dementia in Wales aged 65 years or over who are diagnosed (registered on a GP QOF register) is available up to the period 2017/18.

Discussions to be picked up with Primary Care.

Cwm Taf Morgannwg

For practices not offering appointments specifically between 18:00 and 18:30 hours, it has been noted that, in the majority of practices, appointments run up to practice closing hours i.e. 18:30 hours. Depending on need, the last appointment would be scheduled to conclude by closing hours 18:30 hours.

Data is not currently available

What actions are we taking?

Regular assessing of practices are meeting needs by:

- Practice development visits are completed for all GP practices where discussion on access is an integral part. During the visit the following is reviewed with the practice:
- Practice Opening times and Surgery Sessions: Emphasis is given on the optimum opening times:
- Doors open Phones on 8.00 am - 6.30 pm
- *Open all day Thursday (unless under special circumstances and agreed with CTUHB)
- Provide access to an appropriate member of the practice primary care team within 24 hours?
- The opportunity to pre book an appointment up to two weeks in advance?
- Giving patients the opportunity to be seen by a GP of the patient's choice, within 4 weeks?
- Allowing patients to book an appointment with one telephone call, with no need to call back or be directed to book online?
- Is telephone access directly to a member of staff (not a recorded message) available from 8.00 am - 6.30 pm and can patients' book telephone consultations.
- Are the doors open, phones on and reception manned during lunchtimes?
- Practices across all 4 clusters worked with the Primary Care Foundation to analyse their access and capacity to identify areas that they could improve upon or ways to work smarter. They also completed a 'reception quiz' that looked at variation in response to potentially urgent calls across the reception team.

Percentage of practices open for all of daily core hours, 5 days a week, by health board

Percentage of practices not open for all of daily core hours, but open within one hour of daily core hours, 5 days a week by health board

Nearly all (98%) of practices in Wales offer appointments at some point between 17:00 and 18:30, at least one day a week. However, there is much variation between health boards in later appointments offered with nearly half of practices in Cwm Taf offering appointments every week day for the whole half hour period between 18:00 and 18:30, whereas over 90% of practices in Betsi Cadwaladr and Cardiff and Vale do not offer appointments for the whole half hour period on any day.

Cwm Taf Health Board (as was) compared favourably with other Welsh Health Boards.

| Period: Apr 2018 to Jun 2019 | | Target: 98%/12 Month Improvement | |
| Current Performance: | | How are we doing, what actions are we taking? | |
| Cwm Taf Morgannwg | | <p>How are we doing?</p> <p>This chart shows the percentage of patients who received urgent calls and received clinical assessment within 20 minutes.</p> <p>The current target for this measure is at 98% (with an improvement trend). Our current position is at 78%. (July data is incomplete: data capture undertaken on 15/7/19).</p> <p>What actions are we taking?</p> <p>Whilst noting that the targets were set without the benefit of a detailed demand and capacity analysis, it is clear at the moment that there is a gap, with available capacity insufficient to meet the current target.</p> <p>The main risk would be the availability of medical staff to fill the existing shifts within the core capacity. Thereafter, it may be worth reviewing the nature of the demand to see if there is the potential to reduce the level or avoid certain types of demand altogether.</p> <p>What are the areas of risk?</p> <p>Availability of medical staff to fill existing shifts. There is continued commitment within the service to fill as many shifts as possible for every day in order to provide as much resilience as possible to this key unscheduled care service.</p> | |

| Data not currently available | | The charts shown are a combination of urgent face to face consultation either in the home, or at a Primary Care Centre (PCC). The practical ability to be able to meet the very urgent face to face target needs to be reviewed in the context of, for example, the service having to manage overnight with a single GP, working with the team to provide all aspects of the service during that time. This together with the geography of the region and the location of the Primary Care Centres provide significant challenges to be able to provide this type of urgent access, let alone meet very challenging access target times. (July data is incomplete: data capture undertaken on 15/7/19). | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

Cwm Taf

Bridgend

See graph above

How are we doing, what actions are we taking?

How are we doing?

In terms of the 26 week position, the provisional position for October is 84.5% for the Bridgend area and 82.4% for the former Cwm Taf area, giving a Cwm Taf Morgannwg compliance of 83.1%.

What actions are we taking?

Activity levels continue to be closely monitored month on month at the weekly RTT meetings with continuing representation from colleagues across the new Health Board.

Weekly deep dive meetings are held with senior members of the Health Board.

What are the areas of risk?

- The number of breaches post 1 April 2019 as a result of the boundary change;
- Additional waiting lists added to RTT reporting as from 1 July 2019;
- The number of open pathways 26 and 36 weeks. The provisional October open pathway position is shown below.

How are we doing?

The provisional position for patients waiting over 52 weeks for treatment at the end of October 2019 is 525 patients. Of these 525 patients:

- 307 relate to Bridgend waiting lists.
- 218 relates to Cwm Taf waiting lists.

The provisional position for patients waiting over 36 weeks is 3567 patients across Cwm Taf Morgannwg. Of the 3567 patients:

- 2481 patients relate to the former Cwm Taf waiting lists.
- 1086 relate to Bridgend waiting lists.

(NB this figure of 3567 includes the 525 patients waiting over 52 weeks).

What actions are we taking?

Specific focus going into the new financial year will be to remove the volume of patients waiting at, and greater than, 53 week breaches and address waits at stages 1 and 2: the longest waits will be monitored monthly with improvement expected monthly against the agreed trajectory.

Activity levels continue to be closely monitored month on month at the weekly RTT meetings with continuing representation from colleagues across the new Health Board.

What are the areas of risk?

Focus for the Health Boards is to ensure RTT compliance across all specialities.

For the period 2018/19 Cwm Taf's performance was the best in Wales.

How are we doing?

The provisional position for October 2019 is 873 patients waiting over 8 weeks for diagnostic services. Of the 873 patients:

- 8 patients relate to Bridgend waiting lists
- 865 patients related to the old Cwm Taf patients.

What actions are we taking?

There is ongoing work with the Health Board around waiting list reporting.

How are we doing, what actions are we taking?

How are we doing?

The tables to the left provide a breakdown of those surveillance patients awaiting treatment within the old Cwm Taf footprint. Patients referred into the service for Endoscopy are managed through four referral pathways each with their own waiting time target.

- USC: target 2 weeks
- Urgent: target 2 weeks
- Routine: target 8 weeks and Surveillance with a target of 18 weeks.

Other than "routine" waits the three remaining cohorts of patients are not managed via an RTT diagnostic pathway. Delays to patients within the USC cohort are discussed at the Cancer management meeting.

What Actions are we taking?

Referral demand into the service continues to increase. The Directorate's D&C plan clearly shows that in order to deal with current demand into PCH and RGH, an additional 10 sessions per week would be required. It is anticipated that this would address the current demand, and also enable booking of all patient categories within the required timescales. That said, the additional 10 sessions will not address the anticipated future increase in demand that is on the horizon with the introduction of FIT.

The Directorate is currently utilising insourcing at Royal Glamorgan, to accommodate the surveillance backlog patients with funding approved to continue the service until the middle of November 2019.

Benchmarking: how do we compare?

| Palliative Medicine | 3 | 2 | 0 | 2 | 7 |
| Total | | | | | 14085 |

What are the areas of risk?

The trajectory is based on the following assumptions:

- That activity in ENT and Urology remains at the same level (ie 80 and 50 cases per specialty per week respectively) and that conversion to discharge rates applied are based on outcomes to date
- That where clinics have been confirmed for clinical case review, ie additional clinics (Oral and Maxillo Facial Surgery, Gynaecology, Respiratory and Gastroenterology) a conversion to discharge rate has been applied to the number of cases being reviewed which has been based on outcomes to date;
- Outpatient clinics scheduled specifically for FUNB proceed as planned.

An immediate concern is the potential increase in the number of FUNBs as a result of the boundary change. These numbers are not as yet available.

What actions are we taking?

The FUNB Task and Finish group continues to meet on a fortnightly basis to review the FUNB dashboard and to review progress against individual specialty action plans. Work is also ongoing to validate the list of patients recorded as See on Symptom.

Bridgend colleagues now attend meetings and discussions have commenced with regards to the management of FUNB within POW.

What are the areas of risk?

As identified previously.

Target: SSNAP UK Quarterly Average

How are we doing, what actions are we taking?

During September a total of 80 patients were recorded within the Sentinel Stroke National Audit Programme (SSNAP) database. There were 38 patients with presentations to POW and 42 patients that presented to PCH. There were 4 patient's thrombolysed in all, 3 at PCH and 1 at POW. Unfortunately, only 1 patient was thrombolysed within 45 minutes. The September compliance for the individual sites are shown in the following tables:

Benchmarking: how do we compare?

What actions are we taking?

It is anticipated that Cwm Taf Morgannwg compliance will decline in most areas from that of the previous Cwm Taf footprint. The exception to this is percentage compliance for thrombolysis under 45 minutes which has been consistently higher at POW than at PCH over the last year. Prior to the boundary change both POW and PCH were struggling to achieve 4 hours to ASU compliance this continues to be a significant challenge and the Health Board is now working with the Delivery Unit in this regard. The Health Board also continues to work with the Delivery Unit with regards to the follow up action plan from the thrombolysis review at the end of last year.

Indicator 67: The percentage of emergency responses to red calls arriving within (up to and including) 8 minutes

Outcome: To ensure the best possible outcome, my condition is diagnosed early and treated in accordance with clinical need

Executive Lead: Chief Operating Officer

Period: Apr 2019 to Sep 2019

Target: 65%

Current Performance:

How are we doing, what actions are we taking?

Benchmarking: how do we compare?

Cwm Taf Morgannwg

How are we doing?

The Cwm Taf Morgannwg performance against the Red Calls Ambulance target was 68.1% in September an improvement on 65.9% in August. The All Wales performance was 68.4%.

What actions are we taking?

The Health Board continues to work closely with WAST colleagues to maintain this performance and develop further alternative pathways.

What are the risk areas?

The most significant risk is the boundary change and implications upon the service as a result.

Cwm Taf

Bridgend

As Above

How are we doing?

The A&E departments are committed to ensuring ambulances are released back into the community as soon as clinically possible.

The status for Cwm Taf Morgannwg for October was 63.99%. Compliance for POW was 19.41%, RGH and PCH was 82.59% and 79.48% respectively.

What actions are we taking?

Monitoring of the handover performance continues and alerts are sent to senior managers when delays occur so that they can be reviewed.

Escalation within the departments is embedded to ensure support during times of high acuity.

What are the risk areas?

The most significant risk is the boundary change and implications upon the service as a result.

This is a local measure and therefore no benchmarking data is available

Indicator 68: Number of ambulance handovers over one hour

Outcome: To ensure the best possible outcome, my condition is diagnosed early and treated in accordance with clinical need

How are we doing?
Monitoring of the handover performance continues on a daily basis. There were 407 ambulance delays over 1 hour in October – 376 in POW, 29 at PCH and 2 at RGH.

The Cwm Taf Morgannwg performance for emergency ambulance services over one hour was 88.02% with the performance for the Bridgend area being 60.13%. RGH 99.85% and PCH 97.49%.

What are the areas of risk?
This area of performance is reasonably stable at the Royal Glamorgan and Prince Charles and we do not anticipate any problems, notwithstanding the additional delays at Princess of Wales as a result of the impact of the boundary change.

Cwm Taf Morgannwg

How are we doing?

The combined performance for Cwm Taf Morgannwg University Health Board for the 4 hour target for October was 72.33%. Individual departmental performance was 70.47% at Prince Charles Hospital (PCH), 72.94% at Royal Glamorgan Hospital (RGH) and 70.47% at Princess of Wales (PoW). Compliance for Ysbyty Cwm Cynon (YCC) and Ysbyty Cwm Rhondda (YCR) was 100%.

There were a total of 4634 four hour breaches in October of which there were 1484 at RGH, 1562 at PCH and 1588 at POW.

As Above

As Above

What actions are we taking?

- Daily deep dive work on all acute and community wards continues.
- LA staff are fully engaged in all aspects of patient flow and attend weekly multiagency meetings.
- Twice daily bed meetings continue on each site.
- SW@H service is now in place on both DGH sites and early indications suggest that there is a reduction in LoS.

What are the areas of risk?

Staffing issues continue to be closely monitored.

How are we doing?

The October 12 hour performance for Cwm Taf Morgannwg was 1018 patient breaches. Of these breaches there were 433 at PCH, 171 at RGH and 414 at PoW.

What actions are we taking?

Daily deep dive work on all acute and community wards continues.

LA staff are present on both community sites as routine and patients waiting to transfer to community sites have reduced dramatically. Concentrated effort is now being made to eradicate 12 hour waits. SW@H teams are now in place on both DGH sites and close monitoring of their impact is in place.

What are the risk areas?

Staffing issues continue to be closely monitored.

What actions are we taking?
The new HB has put in place robust processes and actions within POW to address the poor performing areas. These actions include embedding POW into the scrutiny and escalation processes already in place in the former Cwm Taf sites.
A number of the areas above contributing to the breach numbers are outside of CTM. The Directorate escalates these through the respective medical directors, however influencing changes directly is challenging.
Cancer co-ordinator now in post within radiology to push through cancer diagnostic tests and results.
Urology Cancer Pathway co-ordinator role is being set up to expedite cancer patients through the pathway.

Single Cancer Pathway
The Minister for Health and Social Services announced in November 2018 his intention to introduce a single cancer pathway (SCP) across Wales, with Health Boards required to publically report performance against the SCP alongside the current cancer waiting times for all patients diagnosed with cancer and treated from June 2019. SCPs will monitored initially for breast, colorectal, Head and Neck/Mucosal, Head and Neck/Neck Lump, Lung, Upper GI/Gastric and Upper GI/Oesophageal.

Indicator 74: The percentage of mental health assessments undertaken within (up to and including) 28 days from the date of receipt of referral

Outcome: To ensure the best possible outcome, my condition is diagnosed early and treated in accordance with clinical need

Executive Lead: Director of Primary, Community and Mental Health

Period: Apr 2019 to Sep 2019

Target: 80%

Current Performance:

How are we doing, what actions are we taking?

Benchmarking: how do we compare?

As above

Part One of the Mental Health Measure relates to primary care assessment and treatment and has a target for 80% of referrals to be assessed within 28 days. The compliance position for September increased to 67.68% from 65.72% In August.

What are the areas of risk?

The resilience of a relatively small number of teams to maintain performance when there is annual leave and sick leave.

A small waiting list initiative has been extended to support the service whilst work linked to the new Transformation fund is finalised and implemented. Work is also planned in relation to demand and capacity and the first step of this is a training session which is scheduled for November.

| 2018/19 | | | |
| Q1 | Q2 | Q3 | Q4 |
| 84.6 | 83.6 | 67.2 | 93.6 |

For quarter 1 2019-20, 411 contacts were made to the CALL helpline from the Cwm Taf Morgannwg University Health Board area (approximately 92 contacts per 100,000 of its population). This accounted 7.1% of the all Wales total. The local authority area with the highest number of callers is Rhondda Cynon Taf (290) – 70.6% of Cwm Taf Morgannwg's total.

Although the data shows that the subjects discussed by individuals contacting the CALL helpline is wide ranging, the top subject for Bridgend and Rhondda Cynon Taf is mental health and for Merthyr Tydfil it is anxiety. The table outlining the top areas of focus for each local authority identifies other reported conditions – these include depression and suicide ideation.

For quarter 1 2019-20, 5,881 contacts were made to the CALL helpline, of which 5,760 were made by citizens living in Wales (approximately 184 calls per 100,000 of the population). The health board area with the highest rate is Betsi Cadwaladr University Health Board (with a rate of 250 calls per 100,000 of its population), followed by Aneurin Bevan (a rate of 231 calls per 100,000). The health board with the lowest rate is Cwm Taf Morgannwg (92 calls per 100,000).

*2018-19 data is based on 2017 mid-year population estimates, whilst 2019-20 data is based on 2018 mid-year population estimates.

During quarter 1 2019-20, 6 contacts to the dementia helpline were made from the Cwm Taf Morgannwg area. This accounted for 7.0% of the all Wales total. Although the number of residents contacting the dementia helpline is low, the local authority areas with the largest number of callers are Bridgend and Rhondda Cynon Taf (with 3 calls each).

Number of contacts to the Dementia helpline by local authority

Rate of contacts per 100,000 of the health board's population to the Dementia helpline

In comparison with the aforementioned helplines, the number of contacts to the dementia helpline is significantly lower. The total number of contacts to the dementia helpline for quarter 1 was 87, of which 86 were made by citizens living in Wales (approximately 5 calls per 100,000). The health board with the highest rate of contacts is Betsi Cadwaladr (a rate of 11 calls per 100,000 of its population), whilst Aneurin Bevan has the lowest (2 calls per 100,000).

Contacts to the DAN 24/7 helpline – Cwm Taf Morgannwg University Health Board

| | 2018-19 | 2019-20 | | | |
|--|---------|---------|----|----|----|
| | Q4 | Q1 | Q2 | Q3 | Q4 |
| Rate per 100,000 of health board population* | NA | 39.1 | | | |
| Number of contacts for health board | NA | 174 | | | |
| Percentage of the Wales total | NA | 13.3% | | | |

*2018-19 data is based on 2017 mid-year population estimates, whilst 2019-20 data is based on 2018 mid-year population estimates.

For quarter 1 2019-20, 174 contacts to the DAN 24/7 helpline came from Cwm Taf Morgannwg's area (approximately 39 calls per 100,000 of its population). This accounted for 13.3% of the all Wales total. The local authority area with the largest number of callers is Rhondda Cynon Taf (100) – 57.5% of Cwm Taf Morgannwg's total.

Rate of contacts per 100,000 of the health board's population to the DAN 24/7 helpline

The total number of contacts to the DAN 24/7 helpline for quarter 1 was 1,335. The number of contacts associated with individuals residing in Wales was 1,309 (approximately 42 calls per 100,000 of its population). Betsi Cadwaladr UHB's catchment area had the highest rate of contacts (46 calls per 100,000 of its population), whilst Hywel Dda UHB's catchment area had the lowest rate (34 calls per 100,000).

Indicator 85: The percentage of health board residents in receipt of secondary mental health services (all ages) who have a valid care and treatment plan (CTP)

Outcome: My individual circumstances are considered

Executive Lead: Director of Primary, Community and Mental Health

Period: Oct 2018 to Sep 2019

Target: 90%

Current Performance:

How are we doing, what actions are we taking?

Benchmarking: how do we compare?

Cwm Taf Morgannwg

The Performance Target for Cwm Taf Morgannwg at the end of September was 91.6% which is an increase from 90.2% at the end of August. This Performance Indicator Target remains at 90%. Compliance for both CAMHS and Learning Disabilities decreased slightly in September with CAMHS reaching 97.8% from 100% in August and Learning Disabilities reaching 95.4% from 97.2% in August. However, both remain above the 90% compliance level. There has also been an increase in compliance for adult and older persons with adult services increasing from 88.7% in August to 90.3% in September and older persons increasing from 93.8% in August to 95.4% in September.

Cwm Taf: to 31st March 2019

- Adult **90.3%**
- Older Persons Mental Health **95.4%**
- Learning Disabilities **95.4%**
- CAMHS **97.8%**

A Demand & Capacity exercise has recently taken place in CAMHS due to a gap in current capacity to meet demand. New Welsh Government funding is being directed to help increase capacity and compliance has now reached 100%.

Engagement on the current model of adult community mental health services reinforcing the challenge in this area and that the volume of CTP's need completion by the medical team is not sustainable, the completion of this process will lead to a number of recommendations and a paper is being finalised and alternative models being explored. Waiting list work will continue until more sustainable approaches are in place and these have continues to a steady increase in the amount of people who have a valid CTP which is key to appropriate care.

The graph opposite shows the compliance for Cwm Taf Morgannwg from April 2019 which indicates compliance against the 90% target for Part 2 of the Mental Health Measure.

OUR STAFF AND RESOURCES – People in Wales can find information about how their NHS is resourced and make careful use of them

Indicator 88: The percentage of patients who did not attend a new outpatient appointment (for selected specialties)

Outcome: I work with the NHS to improve the use of resources

Executive Lead: Chief Operating Officer

Period: Nov 2018 to Oct 2019

Target: 12 Month Reduction Trend

Current Performance:

How are we doing, what actions are we taking?

Benchmarking: how do we compare?

Cwm Taf Morgannwg

Data not currently available

The percentage DNA rate of new outpatient appointments for the specialties identified in the adjacent table for the rolling 12 month period to October 2019 is 7.47%.

Work is in progress as part of the cross cutting themes in this regard within the planned care stream.

Short notice hospital cancellations are the main risk and needs to be reduced to a manageable number.

Benchmark data not available from 1st April 2019

Indicator 90: Quantity of biosimilar medicines prescribed as a percentage of total 'reference' product plus biosimilar

Outcome: Resources are used efficiently and effectively to improve my health outcomes

Executive Lead: Director of Primary, Community and Mental Health

Period: 2017/18 to 2018/19 Qtr. 1

Target: Quarter on Quarter Improvement

Current Performance:

How are we doing, what actions are we taking?

Benchmarking: how do we compare?

Cwm Taf Morgannwg

Data not currently available

The table does not reflect the actual status of biosimilar uptake in CTUHB, this could be due to the inclusion of insulin glargine in primary care which is skewing the results of the basket of medicines included. All Wales central data shows that CTUHB has the following percentage use of biosimilar medicines prescribed as a percentage of the reference product:
 Etanercept- 86%
 Influximab - 100%
 Rituximab - 100%
 Filgrastim primary and secondary care - 100%

Cwm Taf

From up to date local data: All suitable patients have been switched to biosimilar product for these medicines. For insulin glargine there is very little difference in the cost of the biosimilar vs the originator product and so no incentive to switch diabetic patients. In addition CTUHB prescribes proportionately less insulin glargine than other HBs.
 Insulin glargine secondary care 4%
 Insulin glargine primary care 3%.

CTUHB have agreed a programme of maximising the use of biosimilar products where there is a cost effective benefit. A medicines management nurse is supporting this programme ensuring a safe and effective process for clinical staff and patients. The programme is monitored via the monthly CRES process.

Clinical staff have been engaged and supportive of the changes, although discussions are still ongoing with some clinicians over the use of a new biosimilar – Adalimumab.

Risks are: there are patients who cannot tolerate or do not consent to change to the biosimilar and so there will always be some prescribing of the originator product. Supply of the biosimilar products must be sustainable.

| Quantity of biosimilar medicines prescribed as a percentage of total reference product plus biosimilar | | | | | | | | |
|--|-----------|-------|-------|-------|-------|-------|-------|-------|

How are we doing, what actions are we taking?

Individual clinical practice and women's choice have been identified as the main contributors to high rate of C-Section births. This is being addressed by the multidisciplinary team aiming for a reduction by 1% each year until the combined target rate of 25% is achieved for elective and non-elective c-sections.

Continued drive towards an increase in Midwifery led Care and Normal Birth with all healthy pregnant women having the option of home birth, free standing birth Centre at RGH, Alongside Midwifery Unit at PCH. As the default position in an 'opt out' model rather than 'opt-in' in order to reduce medicalisation of childbirth with increased use of water for labour/birth.

Birth Choices Clinic established 2015 to support and counsel all women who have had a previous CS, traumatic vaginal birth or with a fear of childbirth in support of developing a birth plan in support of normal birth. Women invited to provide 'Patient Stories' to share learning/outcomes and highlight the impact on the Patient Experience
Continuous audit of all Inductions of Labour.

CS rate a standing agenda item on Monthly Audit Meeting, Monthly Labour Ward Forums, Quarterly Directorate Quality & Safety Meeting and Bi-monthly joint (cross sites) Consultant Obstetric.

Meetings with the Directorate Management Team and Senior Midwives.

Education of Community Midwifery Teams ongoing in support of promoting choices for place of birth in line with WAG requirement for 45% of women to be offered birth in a midwifery led environment and to ensure appropriate Lead Professional throughout the pregnancy, with women returning to Midwifery Led care following Obstetric review if appropriate.

How are we doing, what actions are we taking?

As at 1st November 2019 PDR compliance is **60.86%***, an increase of **2.82%** since last reporting period and maintenance of an upward trend from May 19.

**All historical PDR data from the Bridgend area has now been manually uploaded onto ESR and are included in the compliance data above.*

This month continues to see Directorates (20) reporting an increase in compliance.

Using ESR Business Intelligence to report PDR compliance

- ESR Business Intelligence (BI) continues to be used to report PDR compliance to Directorate Managers & Director of Nursing.
- Managers are able to access BI PDR Dashboards through their ESR Self-Serve Accounts allowing them to view a full set of compliance data for their area of responsibility, accessible at any time and always less than 24 hours old.
- Guides on "How to Access/Use BI Dashboards" are available via the ESR Self-Serve SharePoint site

The Learning & Development Department continue to support Directorates in the following ways to improve PDR compliance:-

- Providing a comprehensive suite of reports to DMs on a monthly basis providing the latest PDR compliance data, contextualising each Directorate's performance; what to do to improve compliance; where to seek further help and guidance
- Supporting the PDR agenda at the Clinical & Corporate Business Meetings through preparation of summary reports via the PMO Office.

Bridgend

Data not available

Before a detailed training delivery plan can be developed, the new CTM UHB needs a clear picture of its current compliance with Core Mandatory Training requirements. To facilitate this, each individual's historical training record is compared against identified training requirements. The vehicle for managing and monitoring compliance with mandatory training is the ESR.

Training needs and training records exist within ESR for staff from the historical CTUHB but not for staff transferred from the Bridgend area into the new CTMUHB.

Training Completed: The transfer to CTMUHB's ESR of training records and in date ESR competencies for Bridgend staff, for training undertaken prior to 01 April 2019, has been completed.

Training Needs: The actual training requirements for each member of staff from the Bridgend area is currently being determined by the relevant SME and uploaded into ESR.

This work is being undertaken in two phases; the simple, low level training needs have been completed:

- Equality
- Violence Against Women
- Information Governance
- Environmental Waste
- Health, Safety & Welfare Level 1
- Moving and Handling Level 1
- Dementia
- IQT

Once this work is complete, reports will provide a true reflection of the UHBs compliance and work can begin on the production of training delivery plans.

Source: ESR, L&D W&OD

Indicator 97: Percentage of sickness absence rate of staff

Outcome: Quality trained staff who are fully engaged in delivering excellent care and support to me and my family

Executive Lead: Director of Workforce and Organisational Development

Period: Jan 2016 to Sep 2019

Target: 12 Month Reduction Trend

Current Performance:

Cwm Taf Morgannwg

Cwm Taf: to 31st March 2019

Bridgend: Rolling 12 months to 31st March 2019

How are we doing, what actions are we taking?

Sickness absence increased to 6.02% in September (5.39% in August) which is above the Health Board's target of 5% (pay review is 4.2%). Anxiety, stress and depression still remains the highest category of sickness absence (around 30%). We continue to monitor hot spot areas are being targeted to attend courses such as mindfulness and managing stress in the workplace.

Attendance of the Managing Attendance at Work package. The percentage of all managers attending is now 55%.

We are currently recruiting a clinical psychologist to improve the service we provide employees with mental health illnesses. (highest reason for sickness absence)

Improved self-referral times for physiotherapy access. (MSK illnesses are the 2nd highest reason for sickness absence)

Dietetic expertise with OH using the FODMAP principles (gastro illnesses are the 3rd highest reason for sickness absence)

Sickness work stream continues to meet monthly, including staff side and Occupational Health.

We continue to run 8 week mindfulness course which has an evidence based outcome of improving employees return to work sooner than anticipated when absent from work due to stress and/or anxiety.

We are working to break down the category of stress as the reason for absence so that work related stress can be highlighted and dealt with more effectively. This will allow for positive action to be taken to help reduce its impact on individuals.

Benchmarking: how do we compare?

For the 12 month period to Aug 2019 (All Wales Dashboard Statistics) we remain in the upper quartile of sickness absence across Wales. We have seen an increase in our sickness absence this month and we continue to try and achieve a significant improvement.

| Acronym | Detail | Explanation |
|--------------|---|---|
| AvLos | Average Length of Stay | A mean calculated by dividing the sum of inpatient days by the number of patients admissions |
| CALL | Community Advice & Listening Line | Offers emotional support and information/literature on Mental Health and related matters to the people of Wales |
| C. difficile | Clostridium difficile | A bacterium that can infect the bowel and cause diarrhoea. |
| CHKS | Part of Capita PLC | Leading provider of healthcare intelligence |
| CTP | Care and Treatment Planning | New measure within Mental Health Services |
| DAN 24/7 | Wales Drug and Alcohol Helpline | A free and bilingual helpline providing a single point of contact for anyone in Wales wanting further information or help relating to drugs or alcohol. |
| DNA | Did not attend outpatient clinic | A count of patients that failed to attend an outpatient appointment and did not notify the hospital in advance. |
| DSU | Delivery and Support Unit | The Welsh Government established the Delivery and Support Unit (DSU) to assist National Health Service (NHS) Wales in delivering the key targets and levels of service expected by both the Welsh Government and the public of Wales. |
| DTOC | Delayed transfers of care | A patient who continues to occupy a hospital bed after his/her ready-for transfer of care date during the same inpatient episode. |
| E.Coli | Escherichia coli | A bacteria found in the environment, foods and intestines of people and animals. |
| EDDS | Emergency Department Data Set | A data set which is made up of both injury data and illness data received from each of the Major Emergency Departments across Wales. |
| FCE | Finished Consultant Episode | A period of care under one consultant within one hospital |
| FTE | Full Time Equivalent | Number of employed persons as a whole unit |
| GP Cluster | GP Practice Cluster | Grouping of GP's & Practices locally determined by individual Local Health Boards |
| HAI | Hospital Acquired Infection | Any infection that occurs during a patient's stay in hospital |
| HPV | Human Papilloma Virus vaccination | A vaccination to reduce the incidence of communicable diseases |
| HONS | Heads of Nursing | |
| KSF | Knowledge & Skills Framework | KSF defines & describes the knowledge & skills NHS staff need to apply in their work to deliver quality services |
| LPMHSS | Local Primary Mental Health Support Services | Under provisions of section 2 of the Mental Health (Wales) Measure 2010, all local mental health partners must work jointly to agree a scheme for the provision of mental health services within the area. |
| MAMSS | Models for Access to Maternal Smoking Cessation Support | Supporting pregnant women to stop smoking |
| MMR | Mumps, Measles, Rubella vaccination | A vaccination to reduce the incidence of communicable diseases |
| MRSA | Methicillin Resistant <i>Staphylococcus aureus</i> | A type of bacteria resistant to several widely used antibiotics. |
| MSSA | Methicillin Sensitive <i>Staphylococcus aureus</i> | A type of bacteria not resistant to certain antibiotics. |
| Mortality | Measured as Crude Death Rate | The simplest death rate is the crude death rate & is usually calculated for periods of one year |

| Acronym | Detail | Explanation |
|---------|--|---|
| NEWS | National Early Warning Score | Wales became the first country to adopt NEWS, with the life-saving intervention now an integral part of ward care in hospitals across the nation. It is providing frontline clinical teams with a standardised approach to deteriorating patients, meaning life-threatening conditions like sepsis are spotted earlier and stopped more quickly |
| NIHSS | National Institute of Health Stroke Scale | The NIH Stroke Scale/Score (NIHSS) quantifies stroke severity based on weighted evaluation findings. |
| NISCHR | National Institute for Social Care & Health Research | Welsh Government body that develops, in consultation with partners, strategy and policy for research in the NHS and social care in Wales. |
| NUSC | Non Urgent Suspected Cancer | Patients referred as non-urgent patients but subsequently diagnosed with cancer should start definitive treatment within 31 days of diagnosis, regardless of the referral route |
| NWIS | NHS Wales Informatics Service | Have a national role to support NHS Wales to make better use of IT skills & resources |
| PDR | Personal Development Review | Process whereby an employee meets at least annually with their manager or nominated deputy to discuss their performance for the last year, appraise objectives set for the previous year and agree a Personal Development Plan (PDP) for the coming year |
| QOF | Quality Outcomes Framework | The Quality and Outcomes Framework (QOF) is a voluntary system of financial incentives. It is about rewarding GP's for good practice through participation in an annual quality improvement cycle. |
| RRAILS | Rapid Response to Acute Illness | Patients who become acutely ill whilst on wards benefit from early recognition and intervention with rapid treatment and escalation if needed. The aim is to avoid further deterioration and possibly death. |
| RTT | Referral to treatment | 95% of patients referred to Secondary Care planned care services to receive their treatment within 26 weeks. All patients referred to RTT included services are to receive treatment within 36 weeks of referral. |
| TOMS | Theatre Operating Management System | Cwm Taf's local electronic system for managing theatre activity |
| UMR | Universal Mortality Review | Process of reviewing In-Hospital Deaths |
| USC | Urgent Suspected Cancer | Patients referred as urgent suspected cancer and subsequently diagnosed with malignant cancer to start definitive treatment within 62 days of receipt of referral |
| WISDM | Welsh Information Solution for Diabetes Management | ICT solution for the management of diabetes patients across Wales. This will provide a clinical, multidisciplinary record, outpatient workflow and it will share and integrate information across primary, secondary and community healthcare settings |
| YTD | Year to Date | Period commencing 1 st April |
