Audit Wales

Welsh Health Specialised Services Committee Governance Arrangements

Report of the Auditor General for Wales

May 2021

This report has been prepared for presentation to the Senedd under the Public Audit (Wales) Act 2004 and the Government of Wales Act 1998

The Auditor General is independent of the Senedd and government. He examines and certifies the accounts of the Welsh Government and its sponsored and related public bodies, including NHS bodies. He also has the power to report to the Senedd on the economy, efficiency and effectiveness with which those organisations have used, and may improve the use of, their resources in discharging their functions.

The Auditor General also audits local government bodies in Wales, conducts local government value for money studies and inspects for compliance with the requirements of the Local Government (Wales) Measure 2009.

The Auditor General undertakes his work using staff and other resources provided by the Wales Audit Office, which is a statutory board established for that purpose and to monitor and advise the Auditor General.

Audit Wales is the umbrella brand of the Auditor General for Wales and the Wales Audit Office, which are each separate legal entities with their own legal functions. Audit Wales is not itself a legal entity. While the Auditor General has the auditing and reporting functions described above, the Wales Audit Office's main functions are to providing staff and other resources for the exercise of the Auditor General's functions, and to monitoring and advise the Auditor General.

For further information, or if you require any of our publications in an alternative format and/ or language, please contact us by telephone on 029 2032 0500, or email info@audit.wales. We welcome telephone calls in Welsh and English. You can also write to us in either Welsh or English and we will respond in the language you have used. Corresponding in Welsh will not lead to a delay.

Mae'r ddogfen hon hefyd ar gael yn Gymraeg.

Future arrangements for commissioning specialised services 30

Summary report

Background

1 The Welsh Health Specialised Services Committee (WHSSC) is a joint committee of each local health board in Wales, established under the Welsh Health Specialised Services Committee (Wales) Directions 2009 (2009/35). The remit of the Joint Committee is to enable the seven health boards in Wales to make collective decisions on the review, planning, procurement, and performance monitoring of agreed specialised and tertiary services.

2 The Joint Committee is hosted by Cwm Taf Morgannwg University Health Board and is responsible for the joint planning and commissioning of specialised services on behalf of local health boards in Wales. WHSSC is made up of, and funded by, the seven local health boards with an overall annual budget of £680 million with the financial contributions determined by population need. Some health boards in Wales provide specialised services. In particular, Cardiff and Vale and Swansea Bay University Health Boards receive significant funding for the services that they provide.

3 On a day-to-day basis, the Joint Committee delegates operational responsibility for commissioning to Welsh Health Specialised Services (WHSS) Officers, through the management team (**Exhibit 1**) and supported by six multidisciplinary commissioning teams. These teams commission specialised services, including:

- Cancer and Blood
- Cardiac
- Mental Health and Vulnerable Groups
- Neurosciences and long-term conditions
- Renal
- Women's and children's

Exhibit 1: WHSS management structure

Source: Welsh Health Specialised Services Standing Orders

4 In 2015, two separate reviews highlighted issues with WHSSC's governance arrangements. The Good Governance Institute highlighted concerns relating to decision making and conflicts of interest, and identified the need to improve senior level clinical input as well as the need to create a more independent organisation that is free to make strong and sometimes unpopular (to some) decisions in the best interest of the people of Wales. In the same year, Healthcare Inspectorate Wales (HIW) conducted a review of clinical governance at WHSSC. That review found that WHSSC was beginning to strengthen its clinical governance arrangements but needed to strengthen its approach for monitoring service quality and also improve clinical engagement.

5 Time has now passed since these reviews. Considering the increasing service and financial pressures, and the potentially changing landscape of national collaborative commissioning and NHS Executive as set out in A Healthier Wales, the Auditor General felt it was timely to review WHSSC's governance arrangements. This report considers the extent to which there are effective governance arrangements and whether the planning approach effectively supports the commissioning of specialised services for the population of Wales. Given the impact of COVID-19 on the capacity and productivity of services, we have also highlighted some specific challenges which relate to recovery.

6 Much of our review was carried out between March and June 2020, but as a result of the pandemic, we paused aspects of the review, restarting in July with a survey to all health boards and concluding the fieldwork in October. The delivery of our work included interviews with WHSS officers and WHSSC independent members, observations of Joint Committee and sub-committee meetings, questionnaires of health board chief executives and chairs and a review of documentation.

Key findings

7 Overall, we found **since the previous reviews in 2015, governance, management and planning arrangements have improved, but the impact of COVID-19 will now require a clear strategy to recover services and there would still be benefits in reviewing the wider governance arrangements for specialised services in line with the commitments within A Healthier Wales**.

Governance arrangements have improved but decision making is likely to become more challenging as a result of COVID-19

8 Our work has found improvements in the overall governance arrangements in WHSSC since 2015. WHSSC is formed of a mix of independent members, health board chief executives, and WHSS officers who work in collaboration to lead specialised services commissioning on behalf of the population of Wales. There are benefits to this system of governance which provides partners with the opportunity to collaborate on service developments. In general, we found that the Joint Committee operates well and there is normally a healthy working relationship between Joint Committee members. There are, however, occasions when this has become more challenging, such as discussions around new service models for major trauma and thoracic surgery. This tends to occur when new services are commissioned from providers who are Joint Committee members. This can present a risk of conflict of interest but the negative impact of this has been reduced through the introduction of a new majority voting system. These conflict-of-interest issues will remain a live risk, particularly when considering post-pandemic service recovery.

9 The agenda of the Joint Committee meetings appears appropriate and proportionate. However, our observations highlighted opportunities to increase the attention given to finance, performance, and quality reporting at Joint Committee. We also identified a need to review the independent member recruitment arrangements and the level of remuneration that they receive to help deal with the challenges of independent member turnover.

10 The Joint Committee's sub-committees and groups are well-chaired and administered, although there is a need to strengthen the Integrated Governance Committee to ensure it discharges its terms of reference. WHSSC is hosted by Cwm Taf Morgannwg University Health Board which provides administrative support such as ICT, HR, Facilities, and Communications. WHSSC also forms part of the governance and accountability framework of the Health Board via the Audit and Risk Committee and requirement for financial disclosure in annual reports and accounts. Work is ongoing to strengthen the role and function of the Health Board's Audit and Risk Committee in respect of its hosted statutory joint committees.

11 WHSSC has developed good risk management processes using a corporate risk assurance framework. The risks are regularly scrutinised at corporate and Joint Committee levels with a specific arrangement to capture COVID-19 risks since the onset of the pandemic. Likewise, performance management arrangements provide a good foundation, adopting a tiered model for service escalation and appropriate operational monitoring. WHSSC has adapted these arrangements as a result of the pandemic but may need to become more robust in future to ensure specialised services minimise the risk of harm as a result of delays in treatment.

12 After an initially slow response, WHSSC has responded to the recommendations made in 2015 relating to the need to strengthen quality assurance arrangements. In 2019, WHSSC established a Quality Assurance Team, which is embedding well and is now taking steps to update its quality assurance framework.

Planning arrangements provide a good foundation but there is a need for a clear strategy to respond to the challenges presented by COVID-19

13 Annual planning arrangements are generally effective. Year on year, development and approval of the Integrated Commissioning Plan has become timelier and there are clear formal arrangements for the identification and prioritisation of emerging specialised care services and treatments. Welsh Government officials told us of the additional capacity and capability they received from WHSSC planning officers to help drive through review of health board and trust quarterly plans during the first wave of the pandemic. This provides a good indication of the expertise within the team. Information to support planning and commissioning is improving and this is supported by a performance information system which continues to develop. Delivery of existing commissioned service plans is well managed, but elapsed time for the introduction of new services such as new service models for major trauma and thoracic surgery in South Wales has been slow. This is not within the sole remit of WHSSC but indicates the need for wider 'end to end' programme management at regional levels.

14 Financial planning arrangements are sufficiently robust and linked appropriately to the Integrated Commissioning Plan. COVID-19 has significantly reduced access to some specialised services, and recovery will have some significant financial consequences. There is a need to understand the financial consequences resulting from the pandemic in terms of service recovery. Value-based commissioning approaches are improving, but to maximise recovery with finite resources, this now needs to become more ambitious and more strongly linked to patient outcomes, prioritisation, and decommissioning (where there isn't good evidence that services/interventions are leading to improved outcomes).

15 COVID-19 has delayed specialised services strategy development and will no doubt continue to impact on the timeline for the development of the strategy. Specialised service officers can start to shape a strategy that focusses on the impacts of COVID-19 alongside advances in technological, therapeutic and policy developments. Strategy renewal is more crucial than ever and will need to be shaped around the changing risks and opportunities for specialised services taking consideration of the issues and opportunities identified in this report.

Future arrangements for commissioning specialised services

16 **A Healthier Wales**, the Welsh Government's plan for health and social care in Wales, signalled an intention to review a range of hosted national functions, including WHSSC, with the aim of consolidating national activity and clarifying governance and accountability. Whilst the governance arrangements for WHSSC have continued to evolve positively in the main, there would still be benefits in the Welsh Government included WHSSC in the planned review of national hosted functions. In looking at potential future governance and accountability arrangements for specialised services, it should be recognised that the current collaborative commissioning model has strengths in that it creates a collective and jointly owned approach to the planning and delivery of specialist services. However, it also has some inbuilt risks that see individual Joint Committee members having to balance all-Wales needs with those of their population and the individual NHS bodies they lead.

The Welsh Health Specialised Services Committee (WHSSC) commissions around £680 million of specialised services on behalf of the population of Wales and is a vital component of the Welsh healthcare system. Given this level of responsibility and investment, I'm encouraged by the progress WHSCC has made to improve its governance, management, and planning arrangements over recent years.

An immediate challenge for WHSSC is to develop a clear strategy to address the challenges associated with recovering specialised services following the Covid-19 pandemic. My report also shows that there is still a need to take a more fundamental look at the model for commissioning specialised services, in line with the commitment set out in the Welsh Government's NHS Plan 'A Healthier Wales'. It is important that this commitment is taken forward and I hope that the findings set out in this report can helpfully inform that debate.

Adrian Crompton
Auditor General for Wales

Recommendations

17 Recommendations arising from this audit are detailed in **Exhibits 2 and 3**.

Exhibit 2: recommendations for the Welsh Health Specialised Services Committee

Recommendations

Quality governance and management

R1 **Increase the focus on quality at the Joint Committee.** This should ensure effective focus and discussion on the pace of improvement for those services in escalation and driving quality and outcome improvements for patients.

Programme management

R2 **Implement clear programme management arrangements for the introduction of new commissioned services.** This should include clear and explicit milestones which are set from concept through to completion (ie early in the development through to post-implementation benefits analysis). Progress reporting against those milestones should then form part of reporting into the joint committee.

Recommendations

Recovery planning

R3 In the short to medium term, the impact of COVID-19 presents a number of challenges. WHSSC should undertake a review and report analysis on:

a the backlog of waits for specialised services, how these will be managed whilst reducing patient harm.

b potential impact and cost of managing hidden demand. That being patients that did not present to primary or secondary care during the pandemic, with conditions potentially worsening.

c the financial consequences of services that were commissioned and under-delivered as a result of COVID-19, including the under-delivery of services commissioned from England. This should be used to inform contract negotiation.

Recommendations

Specialised services strategy

R4 The current specialised services strategy was approved in 2012. WHSSC should **develop and approve a new strategy during 2021**. This should:

a embrace new therapeutic and technological innovations, drive value, consider best practice commissioning models in place elsewhere, and drive a short, medium, and long-term approach for post-pandemic recovery.

b be informed by a review of the extent of the wider services already commissioned by WHSSC, by developing a value-based service assessment to better inform commissioning intent and options for driving value and where necessary decommissioning. The review should assess services:

- which do not demonstrate clinical efficacy or patient outcome (stop);
- which should no longer be considered specialised and therefore could transfer to become core services of health boards (transfer);
- where alternative interventions provide better outcome for the investment (change);
- currently commissioned, which should continue (continue).

Exhibit 3: Recommendations for the Welsh Government

Recommendations

Independent member recruitment

R5 Review the options to recruit and retain WHSSC independent members. This should include considering measures to expand the range of NHS bodies that WHSSC members can be drawn from, and remuneration for undertaking the role.

Sub-regional and regional programme management

R6 This is linked to **Recommendation 2** made to WHSSC in this report. When new regional or sub-regional specialised services are planned which are not the sole responsibility of WHSSC, ensure that effective multi-partner programme management arrangements are in place from concept through to completion (ie early in the development through to post-implementation benefits analysis).

Future governance and accountability arrangements for specialised services

R7 **A Healthier Wales** included a commitment to review the WHSSC arrangements along with other national hosted and specialist advisory functions. COVID-19 has contributed to delays in taking forward that action. It is recommended that the Welsh Government set a revised timescale for the action and use the findings of this report to inform any further work looking at governance and accountability arrangements for commissioning specialised services as part of a wider consolidation of current national activity.

Main report

Governance and assurance

18 Our review has examined WHSSC's governance and assurance arrangements, such as the way the Joint Committee and its sub-committees conduct business, systems for managing performance and risk, and arrangements to ensure probity and propriety. We found that **governance arrangements have improved but decision making is likely to become more challenging as a result of COVID-19**.

Conducting business effectively

19 We looked at the clarity of governance structures, decision-making arrangements and conduct at the Joint Committee and its sub-committees. We found that **committee arrangements have improved, although challenges around conflicts of interest remain and there is a need for stronger focus on quality, finance, and performance at Joint Committee meetings**.

The Joint Committee is well administered with a healthy relationship between members. However, there is scope for greater scrutiny of service quality and routine finance and performance report, and an opportunity to look afresh at independent member recruitment arrangements

20 The Joint Committee is made up of 15 voting members and three associate members. The voting members include the chief executives of the seven health boards, four independent members (three of whom are drawn from health boards), including the Chair (a Ministerial appointment) and Vice Chair, and four WHSS officers. In October 2020, a new Chair was appointed, taking over from the Interim Chair who had been in post for a little over three years. WHSSC is expecting turnover of independent members in the coming months which will present both capacity and recruitment challenges. It was reported that recruiting independent members is difficult, especially since the pool from which they can be recruited is limited to health boards only. Consideration should be given to widening the recruitment pool to include all NHS Wales organisations, not just health boards. In addition, there is no additional remuneration for independent members of WHSSC, which makes the position less attractive. Thought, therefore, should be given to whether the current remuneration arrangements reflect the commitment expected of independent members of WHSSC.

21 We observed the Joint Committee both before and during the pandemic. Meetings were well attended and the relationship between members was respectful with a healthy level of challenge. Due to the pandemic, WHSSC moved to holding virtual meetings from March 2020. At this time, the Joint Committee's agenda had a COVID-19 focus with updates on commissioning independent hospitals, which the WHSS team was responsible for, risk management and delivering specialised services during the pandemic. WHSS officers fed back that the revised arrangements improved meeting efficiency and engagement and created better approaches for responding to questions. Moving forward, we would encourage WHSSC to review and consider the advantages of retaining these arrangements.

22 Those we interviewed were positive about the Joint Committee, indicating that it had matured in the past one to two years. Generally, it was felt the Joint Committee works effectively, is open and transparent, that chief executives are supportive of each other, and that roles and responsibilities are clear. Our observations at Joint Committee indicated a tendency to focus on new service modelling which resulted in a south Wales focus in meetings. We also saw limited discussion about the performance of commissioned services. Despite good systems for quality assurance at an operational level within WHSSC, there is a lack of sufficient oversight at Joint Committee. These need to be strengthened as part of a focus on service recovery.

Decision making arrangements have improved, but conflicts of interest remain a risk

23 WHSSC commissions specialised health services for Wales as a whole. Whilst membership of the Joint Committee is drawn from existing health boards, the members are supposed to be independent. However, decision-making for some members poses a potential conflict of interest. This is because the larger Welsh health boards are substantial providers of specialised services, especially in south Wales. Those we spoke to reported that there can be some tensions around negotiations, citing the major trauma centre and thoracic surgery, and potential to draw attention on these specific issues at committee meetings at the expense of wider aspects of the agenda.

24 As a result of previous challenges in decision making, WHSSC's voting arrangements changed from 100% agreement required to a two-thirds majority vote in accordance with a Ministerial direction dated 12 November 2018. This was subsequently reflected in an amendment to WHSSC's standing orders. The new voting system is more pragmatic and ensures quicker decision-making, but this was introduced relatively recently, so WHSSC should keep this new arrangement under review. The governance arrangements mean that chief executives and independent members take part in votes on commissioning services from their own health board. As a result, the previous interim Chair of WHSSC reinforced the need to act on behalf of the all-Wales position when making decisions. Moving forward, the difficulties presented by the pandemic are likely to be challenging. When acting on behalf of 'all-Wales' and to minimise patient harm as a result of delays in receiving specialised care, shifts in investment may be necessary. This again may increase the risk of conflicts of interest if chief executive members are required to vote on diverting investments from their own health boards.

Flows of assurance between the Joint Committee and individual health boards are variable

25 As the Joint Committee commissions specialised services on behalf of the seven health boards, we would expect to see clear lines of assurance from the Joint Committee to individual Boards. On reviewing health board papers[1] we found that as a minimum all seven health boards had approved their own standing orders, which set out their responsibilities regarding WHSSC, and WHSSC's standing orders. All health boards report WHSSC's assurance reports and minutes of the Joint Committee meetings (or provide a link to the minutes).

26 However, health board minutes show some variability in the extent of discussions of WHSSC services. For example, the programme business case approval for major trauma and thoracic surgery prompted extensive papers and good discussion at health boards. But at other times WHSSC papers were just noted with limited discussion. We found that Board level oversight of quality and escalated specialised services appears limited, but we note that this is something WHSS officers are working to improve through their engagement work with health boards across Wales.

1 For each health board, we reviewed its Board papers and papers for its quality and safety, finance and performance meetings.

WHSSC's hosting arrangements function largely as intended, albeit there are occasional operational challenges and an opportunity to strengthen the governance role of the host health board's Audit and Risk Committee

27 WHSSC is hosted by Cwm Taf Morgannwg University Health Board which provides administrative support such as ICT, HR, Facilities and Communications. WHSSC employees have a contract of employment with Cwm Taf Morgannwg University Health Board and WHSSC's Managing Director has a line of accountability to its Chief Executive. Interviewees indicated that in general these arrangements operated sufficiently, but there were some concerns expressed about Cwm Taf Morgannwg University Health Board's capacity to support WHSSC, particularly in relation to HR and ICT support services. In addition, it was noted that Cwm Taf Morgannwg University Health Board is a provider of specialised services commissioned by WHSSC, which could provide further conflicts of interest over and above the inherent provider/commissioner tension at Joint Committee.

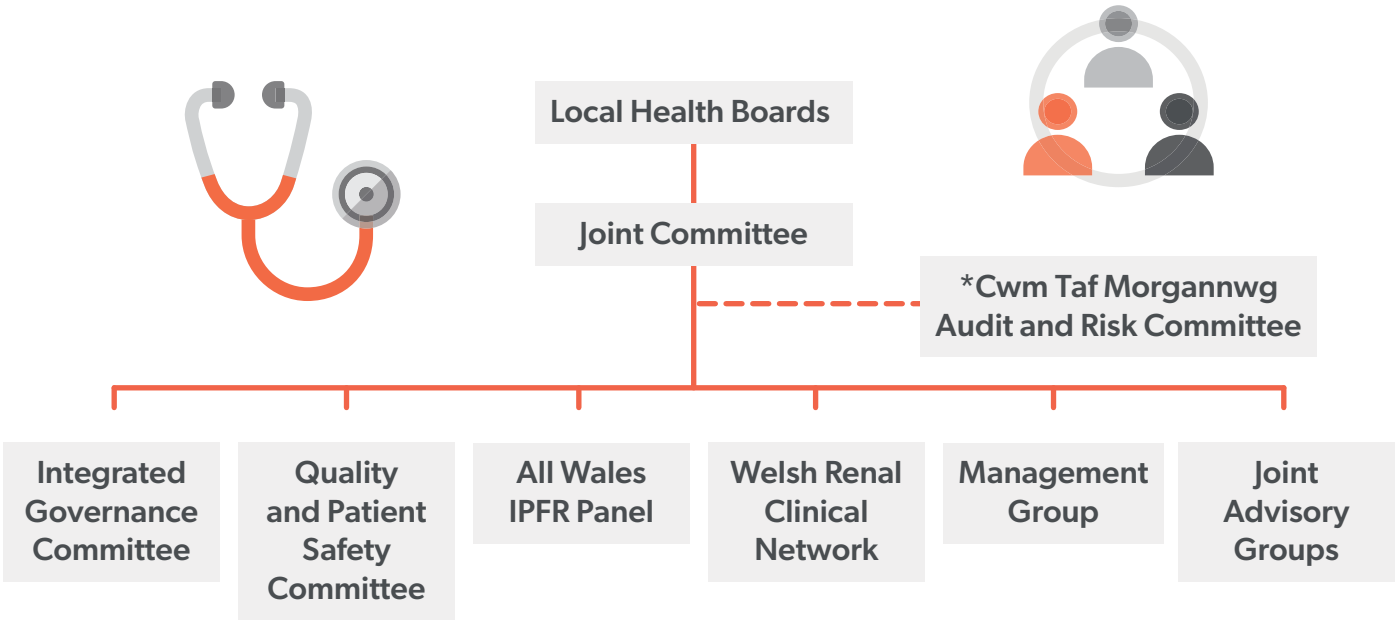
28 A hosting agreement exists between WHSSC and the seven Welsh health boards which includes provision for Cwm Taf Morgannwg University Health Board's Audit and Risk Committee to assist in the discharge of WHSSC's governance and assurance responsibilities. However, the existing hosting agreement has limited detail on how these arrangements should work, and the degree of scrutiny of WHSSC business at the committee can be fairly limited. Hosted organisations are considered at Part 2 of Audit and Risk Committee meetings. Cwm Taf Morgannwg University Health Board is working to clarify the assurance requirements of the hosted bodies[2] through developing an assurance framework. The new framework aims to define the role, function, responsibilities and accountabilities of the Audit and Risk Committee, the host, the all-Wales statutory joint committees and the directors involved. We understand that this work is ongoing and will require further engagement across all bodies affected.

2 Cwm Taf Morgannwg University Health Board is also the host for the Emergency Ambulance Services Committee (EASC) and the NHS National Imaging Academy.

WHSSC's sub-committees and groups generally operate well, although there is a need to ensure that all aspects within terms of reference are appropriately covered

29 WHSSC is required through its standing orders to have committees responsible for quality and safety, and audit. As identified earlier, the Audit and Risk Committee is facilitated through hosting arrangements. However, the Joint Committee is also supported by a range of its own sub-committees and groups (**Exhibit 4**). Some provide scrutiny and receive assurances, while others are more focussed on delivery and decision making. The Quality and Patient Safety Committee, forms part of WHSSC's own committee and group structure. The Joint Committee also has three advisory groups, which at the time of our fieldwork were under review.

Exhibit 4: WHSSC Governance Structure[3]



* Functions as both the Health Board's Audit and Risk Committee and WHSSC's Audit Committee.

Source: WHSSC

3 See section 2.3 of the 2019/20 WHSSC Annual Governance Statement for more information on the arrangements for Cwm Taf Morgannwg's Audit and Risk Committee and Quality and Patient Safety Committee in relation to WHSCC governance.

30 Most of our observations took place prior to the pandemic. Generally, we found that the meetings had a clear agenda, were well administered with formal procedures observed as expected, such as declarations of interest and review of previous minutes. Meeting papers were clearly written with a templated cover report detailing the purpose of the paper such as for approval, noting and assurance. The sub-committees have an up-to-date work programme and terms of reference.

31 WHSSC's Quality and Patient Safety Committee effectively scrutinises assurance reports from all of its commissioning teams on escalated services, service risks, quality visits, inspections and any incidents or concerns. The committee also receives reports on concerns, serious incidents, ombudsman reports, clinical policy review and COVID-19. WHSS officers are also aiming to improve the flow of information between WHSSC and the quality and safety committees of health boards.

32 During 2019-20, the Integrated Governance Committee met infrequently, leaving a six-month gap between the October 2019 and April 2020 meetings. However, the number of meetings was still in line with the committee's terms of reference and, since April 2020, the frequency of meetings has increased. Our work indicates that there needs to be greater clarity on the role and function of this committee. At present, part of the Integrated Governance Committee's remit is to maintain oversight of the work of the Quality and Patient Safety Committee, Audit and Risk Committee, and the Welsh Renal Network. The Integrated Governance Committee is also responsible for scrutinising delivery and performance of the Integrated Commissioning Plan. Whilst there was good oversight of the plan's development by the committee, we found that with the exception of a routine report on escalated services, there was no evidence of wider scrutiny of delivery against the plan.

33 Our observations found that Management Group, an officer-level group which makes recommendations to the Joint Committee, is well chaired, and in general papers are well discussed. But, as with Joint Committee, we saw a need for better discussion of performance, finance, and service quality and patient safety.

Systems of assurance

34 We examined whether the Joint Committee has an effective system of internal controls to support assurance systems. We found that **in recent years there has been notable strengthening of systems of assurance, but there is scope to strengthen them further**.

Arrangements to promote probity and propriety are in place

35 WHSSC's governance and accountability framework was last fully reviewed in September 2019. This version reflects the amended voting arrangements and includes:

- Standing Orders
- Memorandum of Agreement
- Hosting Agreement
- Joint Committee Business Framework

36 To help ensure probity and propriety, WHSSC maintains registers for declarations of interest and gifts, hospitality, and sponsorship. The registers are appropriately updated, with records available on the WHSSC website and declared within the Annual Governance Statement.

37 WHSSC keeps an internal audit recommendation tracker, which is clearly formatted and reviewed at each Audit and Risk Committee meeting. There were no external audit recommendations on the tracker when we conducted our review, but we are told that historically recommendations have been listed on the tracker and they were scrutinised in the same way as they were for the host. We would particularly expect the recommendations made in this review to appear on the tracker and be subjected to scrutiny.

38 WHSSC also monitored progress against the 2015 Good Governance Institute and HIW reviews. WHSSC developed a governance action plan and most actions are closed. The Integrated Governance Committee received six-monthly updates on the outstanding actions, the last of which was in March 2019.

Good risk management processes are in place, with risks regularly scrutinised at corporate and Joint Committee level, and systems in place to capture risks arising from COVID-19

39 WHSSC has a Corporate Risk Assurance Framework (CRAF) which identifies high-level risks to commissioned services. Each of the commissioning teams has a risk register. Risks rated 15 or above after controls are put in place are escalated to the CRAF. The Joint Committee has sight of the CRAF twice a year and it is reviewed regularly by the sub-committees and the Corporate Directors Group Board. The CRAF is clearly presented and includes the information we would expect to see on a corporate risk register including a lead director and assuring committee for each risk.

40 WHSSC has recently updated its integrated risk management framework including reviewing existing risk registers, developing a new risk register template, and training staff. The framework sets out accountabilities, responsibilities, and the organisation's risk appetite. WHSSC is seeking further improvements to tighten escalation and de-escalation processes and by introducing an electronic risk management system. It hopes to roll out new risk processes in spring 2021.

41 During the pandemic, a separate risk assessment and register was completed to assess how essential specialised services were impacted by COVID-19. The assessment is a live document which is updated as providers supplied more information. The Joint Committee continues to review both the COVID-19 risk register and the CRAF.

WHSSC is taking necessary action to strengthen its performance management arrangements but will need to consider how these are adapted to monitor and manage the post-pandemic recovery of services

42 WHSSC predominantly monitors a service's performance through national key performance indicators. The measures are set out in contracts and service specifications. Underperformance is managed through WHSSC's escalation framework, which has four levels of escalation, with level four being the highest. The WHSS team holds regular Service Level Agreement (SLA) meetings with Welsh providers, and at least an annual contract meeting with English providers. Escalated services are subject to enhanced performance management arrangements until significant improvement can be demonstrated to allow de-escalation.

43 During the height of the pandemic, WHSSC stood down SLA monitoring in line with the Welsh Government's practice. At this point only essential specialised services were being delivered. During this time, the WHSS team found it difficult to engage with both Welsh and English providers who were heavily focussed on the pandemic. Pragmatically, to overcome this they adopted a direct monitoring system, reviewing available performance data and challenging providers on the findings. WHSSC is still 'direct monitoring' services and is sharing information with the Welsh Government. Where the WHSS team has been able to proactively engage with providers they have been able to negotiate the continuation of some services. WHSSC reported that despite the pandemic, escalation arrangements continued to work well, and it has helped to highlight differences in activity and productivity between different providers.

44 The pandemic has also highlighted the need to review performance management arrangements and metrics. For example, performance against referral to treatment (RTT) waiting times was often used to determine escalation levels[4]. But in the current climate where RTT waiting times have risen across the NHS, it is difficult to differentiate risk of harm or patient outcome when so many patients are delayed and waiting. As a result, WHSSC is currently in the process of reviewing each service in escalation to see if it is still relevant. WHSSC does not currently have an overarching Performance Management Framework, although it has developed a performance analysis system called 'MAIR' (My Analytics and Information Reports). However, the team is developing a Commissioning Assurance Framework. The framework will set out a new performance assurance process alongside more outcome focussed performance measures. It also proposes an annual meeting between WHSSC executives and health board executives to understand commissioner priorities to feed into the Integrated Commissioning Plan development process. It is hoped the new framework will be launched alongside the refreshed Integrated Commissioning Plan. This is a positive development as monitoring services as they recover from the pandemic will need a different approach. Reviewing data on patient outcomes and harm will need to be an important part of these developing arrangements.

45 WHSSC's integrated performance dashboard is presented to the Corporate Directors Group Board and Management Group monthly, and to the Joint Committee bi-monthly. While there is discussion and challenge at commissioning team meetings, as stated earlier, we observed little scrutiny of this report at Joint Committee. The existing reports do not have a breadth of measures, reporting mainly on waiting times and RTT performance and there is opportunity to refresh these as part of post-pandemic recovery and the new Commissioner Performance Assurance Framework.

4 The escalation framework works on a four-tier basis with level four being the highest level of escalation. Services can be escalated for performance and/or quality issues.

WHSSC is driving quality improvement through its Quality Assurance Team and quality assurance framework

46 In 2015, the Good Governance Institute and HIW made several recommendations related to quality governance. Since these reviews, WHSSC has made good progress in improving quality governance. The Joint Committee has senior clinical representation, the Director of Nursing and Quality Assurance is a member of the Joint Committee and the Medical Director attends the meeting. At an operational level, each of the six multidisciplinary commissioning teams has an associate medical director for clinical advice and guidance.

47 A Quality Assurance team, led by the Director of Nursing and Quality Assurance, was established in 2019. The team is responsible for monitoring and learning from quality and patient experience to help improve commissioned services. Specifically, this includes managing and responding to complaints, near misses, serious incidents and never events. The team is also part of the multidisciplinary commissioning teams and is involved in planning and quality assuring commissioned services. In addition, WHSSC has updated its Quality Assurance Framework which was agreed in 2014 and will form part of the new Commissioning Assurance Framework.

48 To share intelligence and reduce duplication, the Quality Assurance team maintains good relationships with providers and regulators. For example, the team holds quarterly meetings with the quality leads at provider health boards to review a range of quality measures and information. They also use intelligence from regulators, clinical audit, and the National Collaborative Commissioning Unit (mental health services) to feed into planning and monitoring of services. There is a different system for English providers. NHS England has a quality assurance portal, which WHSSC accesses. Information on the portal is detailed and benchmarked against similar NHS England providers. WHSSC plans to replicate this approach for Swansea and Cardiff and Vale University Health Boards.

Strategic planning

49 Our work examined whether WHSSC has a clear and robust approach to strategic and financial planning. As a result of the pandemic, the specialised services environment has changed, with some services, particularly surgical, stopping or significantly curtailed. Our review found that **planning arrangements provide a good foundation but there is need for a clear strategy to respond to the challenges presented by COVID-19**.

Annual planning arrangements are generally effective, but recovery of services will be challenging

50 WHSSC currently undertakes planning each year culminating in a rolling three-year Integrated Commissioning Plan. This plan is agreed annually and has become increasingly timely and mature in recent years. There are clear stages of development and engagement with health boards as part of the approval process, prior to formal ratification/approval at the WHSSC Joint Committee. There is also a clear process and accountability for different stages of preparation and approval and, if necessary, consultation with relevant stakeholders.

51 WHSSC consults key stakeholders and the public on new commissioning policies, service specifications and revised commissioning policies where there are material changes to the service. There are good examples of this in relation to major trauma and thoracic surgery with the relevant community health councils actively engaging in stakeholder feedback and analysis. Community health council feedback informs both WHSSC planning and the relevant health boards whose population may be affected by proposed service changes.

52 The extent that health boards incorporate specialised services within their own integrated medium-term plans is variable across Wales. For example, Powys Teaching Health Board and Hywel Dda University Health Board rely more significantly on externally commissioned specialised services and we see these featuring in their plans more so than in the plans of the health boards that are specialised service providers.

53 Our work indicates that WHSSC has sufficient capacity and capability to support planning. That capacity and capability was drawn upon in 2020 to help support the Welsh Government's NHS Planning Team's review of health boards' quarterly plans, using their knowledge and experience of complex service planning. WHSSC's planning arrangements include significant contribution from each of the specialised services commissioning teams, clinical impact advisory group and WHSSC Management Group. Clinical advice helps to shape specialised services and WHSSC intends to increase the level of internal 'consultant-level' expertise further.

54 WHSSC has adopted a continuous approach for identifying and evaluating new research, treatments and using NICE[5] guidance to shape commissioned services. This 'horizon scanning' is supported by a consistent and transparent prioritisation process (**Exhibit 5**) to help ensure that investment decisions are affordable, offer value for money and are supported by convincing evidence of safety and effectiveness. The robustness of the approach helps to secure agreement of new proposals at the Joint Committee.

Exhibit 5 – key principles of the prioritisation process adopted by WHSSC

- Scoring and ranking of interventions by the WHSSC Prioritisation Panel is carried out using formal and agreed methodology
- The prioritisation process is intended not to duplicate work already completed (for example by NICE)
- There must be appropriate and timely engagement with NHS Wales as part of the process
- There are clear and agreed scoring criteria and voting technology is utilised during assessment. The criteria include:
  - Strength of clinical evidence
  - Patient benefit
  - Economic assessment
  - Burden of disease (severity of condition and also impact on the population)
  - Reducing inequalities of access

55 COVID-19 has significantly affected the delivery of specialised services across Wales and England. After the first wave of the pandemic, we understand that variation in service productivity between providers was increasing, with some providers able to restart specialised services earlier and with greater degrees of success than others. This creates a commissioning challenge as WHSSC looks to develop post-pandemic recovery plans on behalf of the population of Wales.

Information to support planning and commissioning is improving and will need to adapt to the challenges brought about by the pandemic

56 WHSSC's development of My Analytics and Information Reports (MAIR) in 2018-19 was a notable improvement on previous arrangements. WHSSC has worked closely with health board teams to ensure that health boards now have access to the comprehensive information sets now available. Reports can be tailored by health board or provider, by specialty and point of delivery. Results can also be made available using a variety of visualisation tools including maps, charts, tables, and pathways. This has enabled health boards to gain a deeper understanding of their demand patterns for specialised services and compare their own access rates to other health boards and inform areas for targeted review.

57 Plans for further development of MAIR include:

- Producing performance management dashboards and heat mapping
- Improving the timeliness of performance reporting
- Exploring how quality and outcomes data can be incorporated
- Improving the familiarisation of health boards with the variety of WHSSC's contracts by the production of deep dive reports.

58 Commissioning and contracting services can only be effective if there is robust information to inform operational and strategic decisions. Our work has identified that prior to the COVID-19 pandemic, there was a good track record of analysis of demand and capacity of services both in Wales and England. This will become even more important post-pandemic, to help provide options for recovering service performance and reducing risk of harm as a result of delays in access to care.

Delivery of Integrated Commissioning Plans is effective, but development and implementation of new services can be slow

59 For services that are already commissioned and being delivered, the necessary arrangements are in place to ensure they are resourced and being delivered as intended, with arrangements to escalate matters should there be any concerns.

60 Commissioning of new services from first consideration through to the launch of new services can, however, be a lengthy process, particularly for services provided in Wales. For example, the major trauma network in south Wales was launched in September 2020, after having been originally identified as necessary back in 2013, although WHSSC's involvement only commenced in 2018-19. Similarly, the improvements to thoracic surgery services, identified as necessary by the Royal College of Surgeon's report in 2016, are not expected to go live until 2024, and this is subject to a capital business case requiring Welsh Government funding.

61 Whilst introduction of new services is by no means simple, there has been protracted debate on where the new developments mentioned above should be housed, although the statutory engagement and consultation process, which is integral to this, can consume considerable time. The roll out of such schemes is not the sole domain of WHSSC and depends upon the wider architecture that supports regional service development within the NHS in Wales. There is scope, however, to strengthen end-to-end programme management of such schemes to improve timeliness of service development. The pandemic has created a common sense of urgency amongst providers. This momentum needs to be maintained to identify and rapidly develop or reshape services to accelerate recovery.

Financial planning arrangements are sufficiently robust and linked appropriately to the Integrated Commissioning Plan but will need to ensure value for money as services restart and aim to recover

62 Financial planning is an integral element of the Integrated Commissioning Plan. Health boards are fully engaged in discussions on costs and projected cost growth for the coming financial year during planning and agreement stages, prior to ratification of the plan. Cost growth is explicitly defined in the plan and justified through the agreed process for horizon scanning and prioritisation. Financial planning has two distinct elements:

- determining overall specialised services costs and the apportionment of these costs to health boards; and
- contracting and commissioning health boards and trusts in relation to provision of specialised services.

63 These are managed through financial risk-sharing agreements. These agreements set out who pays for what in relation to the provision and receipt of services. The risk sharing agreements are based on a financial formula and this is used both as part of planning and at the year-end to look at variance in activity against plan and determine distribution of under and overspends. There are different models for risk sharing designed to suit different types of commissioned services. For most services, planning is based on actual utilisation and a two-year average of activity. This is designed to smooth some peaks and troughs but also create incentive for efficiency. Highly specialised services which are not utilised often are funded using a population-based formula which is designed to provide continuity of income. This is to ensure services are sustainable, but also to protect against peaks of extreme costs when services are required.

64 Our review of health board expenditure on specialised services for the period 2014-15 to 2020-21[6] indicates the overall costs have increased above inflation. We understand that this is typical when new specialised therapies and treatments are developed and adopted into commissioning agreements.

65 In the short to medium term, however, the impact of COVID-19 on finances presents a number of challenges, including:

- payments to providers have continued in Wales and England albeit recent negotiations have resulted in rebates/reductions where there is under-delivery by providers;
- lack of service delivery during the pandemic has created a backlog of waits for some specialised services; and
- lack of patients presenting to primary and secondary care with symptoms during the pandemic may mean that there is greater hidden demand, and that conditions may have exacerbated, requiring more costly intervention downstream.

66 The Joint Committee should seek to understand the short and medium term financial impacts of COVID-19 to determine what this means for service recovery plans.

6 2019-20 data is taken from the Month 12 Health Board expenditure on Welsh Health Specialised Services. 2020-21 costs are based on forecast expenditure budgeted within the 2020-21 integrated commissioning plan. We acknowledge that 2019-20 data is currently unaudited, and 2020-21 data is subject to significant variation as a result of the COVID-19 outbreak.

Value-based commissioning approaches are improving, but to maximise recovery with finite resources, this now needs more strongly to link to patient outcomes, prioritisation, and de-commissioning

67 Prudent and value-based care is a core aspect of the 2020-2023 Integrated Commissioning Plan. This focussed on increasing the value achieved through improvement, innovation, use of best practice and eliminating waste. The value-based commissioning approach adopted by WHSSC is logical and methodical. This includes identifying commissioning opportunities, refining these, and engaging the WHSSC Management Group members and wider teams. WHSSC has developed thematic areas for value-based commissioning. Some of these will be easier to achieve than others and some may need to be pursued over a multi-year period. The areas include procurement, efficiency, service rationalisation, disinvestment, and assessing access criteria.

68 While COVID-19 has changed the position significantly, the extent of the original value-based commissioning savings for 2020-21 was around £2.75 million. Overall, our review has identified that WHSSC's value-based approach is developing and there is opportunity to exploit this further. In doing so, we expect there will need to be a clear and strong focus on collecting patient outcome information to inform the development of opportunities to reduce waste and maximise the benefit of investment in specialised care. For example, there remains greater opportunity to assess services:

- which do not demonstrate clinical efficacy or patient outcome (**stop**);
- which should no longer be considered specialised and therefore could transfer to become core services of health boards (**transfer**);
- where alternative interventions provide better outcome for the investment (**change**);
- currently commissioned, which should continue (**continue**).

COVID-19 has delayed the development of a new specialised services strategy, but this now provides the opportunity to shape the direction to focus on recovery, value and to exploit new technology and ways of working

69 A key function of commissioning relates to planning of services to meet population need. The specialised services strategy provides a framework for commissioning services, but the current version is dated 2012. Senior specialised services officers had intended to refresh the strategy in 2020, but this has been delayed by the pandemic. However, this gives specialised service officers the opportunity to shape the strategy to focus on COVID-19 recovery arrangements alongside routine technological, therapeutic and policy developments.

Future arrangements for commissioning specialised services

70 Our review, in examining both WHSSC's governance and planning arrangements indicates that **there would still be merit in reviewing the future arrangements for commissioning specialised services in line with the commitments of A Healthier Wales.**

71 **A Healthier Wales**, the Welsh Government's plan for health and social care in Wales signalled an intention to create a national executive to strengthen national leadership and strategic direction across a range of areas. Linked to this, **A Healthier Wales** signalled an intention to review a range of hosted national functions, including WHSSC, with the aim of consolidating national activity and clarifying governance and accountability.

72 Whilst the findings in this report show that the governance arrangements for WHSSC have continued to evolve positively in the main, they do also point to a need still to undertake the wider review signalled within **A Healthier Wales**. The current collaborative commissioning model has strengths in that it creates a collective and jointly owned approach to the planning and delivery of specialist services. However, it also has some inbuilt risks that sees individual Joint Committee members having to balance all-Wales needs with those of their population and the individual NHS bodies they lead.

73 The Good Governance Institute's report in 2015 questioned the hosting arrangements for WHSSC, suggesting that a more national model might be appropriate. WHSSC's hosting arrangements have remained unchanged since that report and our work has shown that in respect of WHSSC's governance, the use of the hosting health board's Audit and Risk Committee needs to be reviewed to ensure there is sufficient depth of debate and scrutiny (see **paragraphs 27** and **28 above**).
